Peking Reported Willing To Talk With Nationalists

By Jay Mathews

HONG KONG, July 16 (WP) — Top Chinese leaders have said that they are willing to negociate directly with the Nationalist Chinese on the future of Taiwan, a delegacion of U.S. congressmen returning from China said yesterday.

Stnements made by Communist Party Vice Chairman Teng Hsiaoping and other Peking officials to Rep. Lester Wolff's delegation appear to be the most conciliatory toward Taiwan in recent years toward Taiwan in recent years. Negotiations between Taipei and

China Said to Fear An Attack by Hanoi

By Linda Mathews

With husloads of ethnic Chinese streaming northward from Vietnam, air-raid shelters being rushed to completion and soldiers patrolling Nanning's outskirts, south China shows the signs of approaching a flash point in the intensifying Peking-Hanoi feud.

Shanghai-made army trucks, used alternately for troop transport and refugee relocation, line a main Nanning intersection. Leaves for all military personnel in the area have been canceled and local residents say that, for the first time, significant oumbers of People's Liberation Army soldiers are pa-troling the outskirts of the city.

The Vietnamese consulate here, ordered closed last week by Peking, stands empty, guarded by a lone marmed soldier.

For days, long convoys of dusty buses have rumbled up the provin-cial roads from the border, some 100 miles, away in 100-degree (F) heat. Battered suitcases and thin

been no official contact with Taiwan, hut you cannot rule out a third time," Rep. Eligio de la Gar-za, D-Texas, quoted a high Chinese official as saying.

At a press conference here, Rep. Wolff emphasized that the Chinese also made a "strong statement" that did not "rule out by any means the use of force in liberating Taiwan." And the Peking officials showed no sign of retreating from their demand that Washington cut off diplomatic relations with Taiwan, end its mutual defense treaty and withdraw all remaining U.S. military personnel from the

Soften Image

Congress and the Carter administration have been reluctant to take such steps in order to bring full diplomatic relations with Peking, without some Chinese guarantee that Taiwan will oot be taken by force. Peking has shown little interest in making such a promise, but the statements to Rep. Wolff's group appear designed to soften the image in American minds of warlike Chinese belligerence toward the Taiwan govern-

The conciliatory statements were "volunteered by the people we spoke to—at several points in our disccussions," said Rep. Wolff, chairman of the Asian and Pacific Affairs subcommittee of the House loternational Relations Committee. In the past, U.S. visitors to Chi-

na who asked about Peking's attitude toward the Kuomintang usually have been lectured on Nationalist crimes, including massacres of Communist Party members carried

out by the late Chiang Kai-shek, Rep. Wolff, who heard the lec-tures when he visited China in early 1976, said that such thetoric was largely absent this time. May Have 'Misled' Congress

Kissinger Doubted on Angola

By Seymour M. Hersh

NEW YORK, July 16 (NYT) -After a secret yearlong study,the Senate Select Committee on Intelligence is said to have coocluded that Henry Kissinger and William Col-by misled Congress about the extent of CIA activities in the 1975 civil war in Angola.

Sources with first-hand knowledge say the committee's extensive compilation of CIA documents indicated, contrary to assertions by Mr. Kissinger and Mr. Colby, that more than \$1 million was allocated to recruit mercenaries, and that an undetermined number of CIA agents helped train military units inside the former Portuguese col-

In a series of interviews during the last two months, the sources said that the study has triggered a dispute among senators and committee staff members as to whether Mr. Kissinger, then the secretary of state, and Mr. Colby, who was di-rector of central intelligence, deliberately lied in testimony before

The study has infuriated senior officials of the intelligence agency. They have been urging the commit-tee to modify the study, saying that

everybody upset," the official said. The implication was clear that it was done consciously and that's what people in the CIA object to." In recent weeks, the official said, the agency has turned more documents and files over to the committee in an effort to show that Congress was not misinformed, and to force a revision of the study. The official said that the agency bas been "showing them the dates" on which specific information about CIA activities was forwarded to the intelligence committee during the Angolan civil war.

Some senators and committee staff members made it clear in interviews that they believed that the CIA documents already compiled, which include cables direct from Angola, not only contradict the testimony of Mr. Kissinger and Mr. Colby, but also indicate that they knew at the time that their testimony was not correct.

The sources said, however, that others on the committee believe there is oo evidence available as to whether Mr. Kissinger and Mr. Colhy saw those documents or were even aware of the extent of CLA activities in Angola.

Another senator acknowledged that there were deep divisions in the committee. Some, he said, "got all excited" about the staff study. They thought it was a great, enormous event, that heads would fall, that we'd rig up the guillotine."

"To me," the senator added, "it's not significant whether somebody does or does not get indicted for He was one of the organizers of a 1974 outdoor exhibition of unofficial art which authorities beaks.

West Germany and France have expressed fears recently be is com-ing empty-handed. If so, the sum-mit meeting can achieve little in the way of global result.

Already "a far-reaching measure of agreement" bas been reached on the "interrelated questions of economic growth, inflation and unemployment," Chancellor Helmut Schmidt of West Germany, host of this fourth economic summit gathering, said at a press con-

He added that a commoo posi-tion on energy was close at hand— an indication that President Carter had succeeded at least partly in convincing the other leaders about his administration's gains in tackling the problem of U.S. oil

Carter 'Pleased'

President Carter told reporters that be was "pleased" with the "constructive" talks, and said be believed that the world economic community would be "pleased with the final result" of the conference.

U.S. Treasury Secretary Michael Blumenthal said that the European participants "appeared satisfied" by President Carter's detailed out-line of the Congressional status of his energy program, which he ex-pected would be passed by Con-gress and enable the United States to cut its oil imports by more than 2 million barrels a day by 1985. Although this statement appeared to include no new U.S. commitment and Mr. Colby denied that any to conserve energy, the other lead-(Continued on Page 2, Col. 6) ers seemed satisfied with President

had not decided on whether to call for a quota on U.S. oil imports if his energy hill fails to pass.

Mr. Blumenthal concluded that

the summil meeting was on its way to a "substantial . . . action program."

Final Communique

However conference participants today agreed not to divulge the specific wording of their points of agreement, apparently to avoid national rivalries on the oustanding points before the final communique is published tomorrow.

In order to have more than psychological impact, the final com-munique tomorrow will have to contain some specific commit-ments, notably from West Germany and Japan about stimulating do-mestie demand and from the United States about improving energy performance and stabilizing the dollar.

Several participants referred to the generally disappointing gap be-tween targets and performance re-corded by industrial countries after their London economic summit conference a year ago, and stressed the need for realistic, specific targets this time.

The meeting also includes France, Italy, Britain and Canada, and a representative of the European Economic Community. The beads of state are accompanied by their foreign ministers and by their treasury and energy authorities. The three groups are meeting sepa-rately for technical talks outside the plenary sessions in the white stucco Schaumburg Palace - the original West German chancellery next door to the steel-and-glass building that is now the chancellor's office.

He buman rights in East Germany and noted that East Germany overnight other Soviet-bloc countries, which had lowered teams of workmen,

His words appeared to be exactly what most West Berliners wanted to hear, and President Carter got the warm praise that Berlin has extended to three previous visiting U.S. presidents since World War Il. While there was oo repetition of the delirious scenes when President Kennedy said "I am a Berliner" shortly after the Berlin Wall was erected, the warm welcome for President Carter seemed to match the calmer mood brought about by

Despite reports of West German Chancellor Helmus Schmidt's disappointment with President Carter and frustration with his administration over effective joint poliocal and economic action, the two leaders chatted amiably at intervals in the day's programs. Presideot Carter told a West German magazine that Mr. Schmidt was "a per-sonal friend." Mr. Schmidt said relations were better than ever.

The Berlin visit was seen bere as a public relations success for President Carter. This city tends to share the U.S. approach to publicizing buman rights violations in Communist countries. However, West German opinion in general is more cautious, fearing that a deteri-oration of U.S.-Soviet could impair this country's success in improving relations with East Germany and bolstering the family and personal ries that Bonn believes will prove more fruitful in changing the Communist climate.

In a gesture reminiscent of Cold War pressure tactics on this city 110 miles inside East Germany, the East German authorities ordered a 'work-to-rule" at the border cross ings on the highway corridors leading into West Berlin, backing up civilian traffic for miles. The measure was a protest against the appearance of Mr. Schmidt and Foreign Minister Hans-Dietrich Genscher of West Germany, who accompanied Mr. Carter to Berlin, East German newspapers said their presence was improper under the four-power agreement on Berlin,

South China Taking Steps To Limit Surprise Attack

(Continued from Page 11 both Vietnam and China have re-

cently reinforced their positions all along the 750-mile border. Peking has reportedly moved 15 army divisions within striking dis-tance of the border, and Hanoi has

countered by sending five divisions north. Full-scale warfare still seems unlikely, but the deployment of several thousand troops along the border markedly increases the chances of accidental shootouts and local skirmishes.

According to intelligence reports. China also has stepped up its naval and air patrols off the coast of Vietnam. Ships from its South China Fleet, usually based in Canton, have moved south to Hainan Island, and some of the vessels reportedly patrol the Gulf of Tonkin to pick up ethnic Chinese fleeing

Viennam in fishing craft. Chinese jet fighters streak almost daily along the border and down the coast to the northern Viet-namese port of Haiphong, Indochinamese port of Happing, indochina watchers can only speculate about the purpose of such missions: the Chinese jets may be flying cover for the naval maneuvers. assessing Vietnamese troop strength or, more ominously, watching for Soviet naval activity.

Within Aircraft Range

Radio Hanoi last week said the Chinese have at least twice violated Vietnamese airspace — a charge Peking has denied - but, wherever the truth lies, the jets have made the point that Vietnam's northern heartland is well within the range of Chinese aircraft.

nam, including the establishment gees coming to this area, like those of a naval depot in Cam Ranh Bay in the bus convoys, are restricted to and the installation of missile bases farms 30 miles out of town, in a near the border. Hong Kong's propeking press has carried similar reports, although Western military with the bus convoys, are restricted to farms 30 miles out of town, in a village called Wu Hua.

although the Soviet is very much on the minds of Chinese in this vulnerable border area. When asked about China's troubles with Vietnam, the Chinese here reply, without exception, "We bave no quartel with the people of Vietnam. There with the people of Vietnam. There less and picking tea.

O Los Angeles Times is a third power encouraging Viet-

Quito

and make trouble with us."
The threat of Soviet missiles appears to account for Peking's recent order to construct vast networks of air-raid shelters underneath all major southern cities. Tunneling began here, and in Canton and Kunming, on a small scale in the late 1960s, when, local officials say, late 1960s, when local officials say, late 1960s, late 19 they were warned about the dan-gers of U.S. bombers from Vietnam. But the work was abandoned because of the remoteness of the enemy and the difficulties of mobilizing the buge work force needed for the task

Southern Chinese, unlike officials of most northern cities, do not yet claim that they can bouse their entire urban populations under-ground, though they are making headway. An enormous hill in Canton's Yuehsiu Park is honey-combed with air-raid tunnels, a tour guide boasted. And in Kweilin, a scenic resort north of here that is popular with Chinese and foreign tourists, the many hillside caves not yet developed as tourist attractions have been converted to

Another major problem for local officials is the flood of refugees from Vietnam, who pose both eco-nomic and security difficulties for this border region. Of the 150,000 ethnic Chinese who have fled Vietnam in the past two months, more than two-thirds have spilled into Kwangsi.

The central government in Peking moved last week to cut the flood to a mere trickle by imposing tough immigration procedures at of Chinese aircraft.

Refugees here report a growing

In the past, Peking's standard conciliatory statement toward Taiwan has been a plea for people on the island in admit their mistakes and come over to the mainland side, rather than a suggestion of talks.

In a speech on March 6, Communist Party Chairman Hoa Kuo-feng said be hoped that "military and administrative personnel of the Kuomintang" would "clearly see the general trend of events and take the road of patriotism and unification of the motherland."

No Similar Remarks

Peking's last apparent public call for negotiations came in February, 1973, when former Kuomintang General Fu Tso-yi addressed a meeting in the Chinese capital. "We are all Chinese," he said in a speech supposedly aimed at Kuomintang officials who had not yet come over to the Communist side. 'Let us come together and talk."

An analyst who has followed Chinese statements closely for the last three years said that be could remember no remarks similar to those made to Rep. Wolff's group.

A member of the group said the Chinese noted that past efforts to cooperate with the Knomintang had not worked well, but they added that many Communist leaders had attended school with Kuomintang officials.

Rep. Wolff said Peking told the group that further sales of U.S. warplanes to Taiwan would interfere with negotiations over a so-lution to the Taiwan issue.

Mr. Carter and Mr. Blumenthal have said here that congressional committees have "passed four-fifths of it." Mr. Carter told the summit meeting today be ex-pecied Congress would eventually pass even the controversial fifth point, the crude oil equalization

· Agreement by West Germany, in exchange, to tax cuts designed to stimulate domestic demand — a step sought by Britain and other countries, which feel that West Germany's prosperity should enable it to take more imports and stimulate European growth.

 Agreement by Japan to admit an additional \$4 billion in Western exports to help offset its \$14 billion trade surplus.

 Agreement by countries like Britain and Italy with balance of payments problems to measures designed to counteract this trend and boost exports. Agreement by all industrial

countries to maintain the momentum of the Geneva trade talks in order to overcome the temptation to trade protectionism that has re-sulted from the current economic

Pravda Hits Adversaries Of U.S. Trade With USSR

portion existing between the crimes

U.S. business community "is bris-tling" at suggestions that U.S.-Soviet trade should be cut back, and it blamed the anti-Soviet feeling in the United States on the "military-industrial complex," which it said "is still stubbornly following the road toward achieving a further increase in international tension."

Administration officials said that Mr. Carter also is prepared to bold up approval of an export license for Dresser Industries to build a plant in the Soviet Union to manufacture oil drilling equipment, according to another source quoted by the Star.

Possible Trade

Reporters accompanying Mr. Carter to the current economic summit conference in West Germany were told yesterday that the Carter administration-will try to obtain a reduction in Mr. Sheharansky's sentence and there was speculation the United States might try to work out an exchange in which Mr. Shcharansky and Mr. Ginsburg would be traded for two Russian UN employees arrested on spy charges in New Jersey.

White House press secretary Jody Powell said that he knew nothing about such prisoner-trade efforts, and that it was premature to be negotiating on Mr. Shcharan-

moveable part of the life of a so-cialist society," he said.

In New York, U.S. Jewish leaders urged Americans to consider a boycott of the Olympie Games in Moscow in 1980.

Rabbi Israel Miller, chairman of the American Zionist Federation, said, "It cannot be business as usual. Holding the Olympics in Moscow is a travesty.

Reporters' Trial to Begin

MOSCOW, July 16 (UPI) — The trial of two U.S. newspaper report-ers accused of slander begins this week in a further test of worsening Soviet-U.S. relations, but the two defendants do not intend to take any part in the court proceedings because they feel that the charges are without merit.

The reporters, Craig Whitney of The New York Times and Harold Piper of the Baltimore Sun, are out of the country. They have said that they will not appear for the civil court hearing Tuesday.

(Continued from Page 1) ortion existing between the crimes and the sentences." The Pravda article said that the I.S. business community "is briscondemned the Soviet Union for

Broadway, Hotels Booming

Big Apple Bobbing Back Place to Visit

By Robert E. Dallos

NEW YORK - Don't look now, ago, even when a good hotel room but that place they call The Big Apple, the one they were writing off a couple of years back, where tourist muggings got to be more prominent than Broadway shows, has done an amazing comeback.

With city fathers still crying for financial aid from Washington and many parts of the place still looking like the aftermath of n bombing raid, it can hardly be said that New York is booming.

But from the standpoint of the out-of-towner. New York apparently is once again the place in visit. Getting a hotel room can be even worse than it was back before "Fun The City." Broadway, which seemed on the year before.

Not too long ago hotels in the city were elosing. Now at least six are under construction or on the drawing boards. These include an electric state of the year before.

Not too long ago hotels in the city were elosing. Now at least six are under construction or on the drawing boards. These include an electric state of the year before. generally is picking up.

Last year 16.8 million business

Last year 16.8 million business and vacation visitors poured into the city, adding about \$1.6 hillion he city, adding about \$1.6 hillion to its economy. New York hasn't seen such numbers since the Wnrld's Fair in 1964 and 1965. So far this year, the number of visitors is running 15 percent ahead of last

Low in 1971 New York's low point was in

1971, when hotel occupancy dipped to 62.5 percent. "We suffered a bad image," said Charles Gillett, president of the New York Convention under the bed. His was one of eight and Visitors Bureau. "Every night rooms ransacked. there was a diatribe on the Johnny Carson Show. Everybody was badmouthing New York, even New Yorkers themselves. Though our crime rate was lower than a lot of other cities - 16 or 17 others, in fact — we had the reputation of being the place to come to get

PACIFIC SOLOIST — Oars in hand. Pat Satterlee leaves San Diego harbor Thursday in an attempt to reach Australia alone by rowboat. It is the first attempt by an American to make the 8,000-mile trip solo by rowboat. In 1971 and 1972, Britons John Fairfax and Sylvia Cook rowed from San Francisco to Australia in 362 days. The first Pacific solo rower was Anders Sveland of Sweden, who made it all the way from Chile to Samoa in 118 days in 1974.

Protest Against Order

Women GIs Share a Tent With the Boys

Europe carried equality of the sexes too far when a half dozen of them

The commander of the unit involved said that he put the women in with the men because he ran short of tents. But at least one of the women

doubts that excuse and believes that they were being harassed by male non-commissioned officers. Whatever the truth, with the Army aiming to have 12 percent of its force female by 1983, such incidents probably will recur.

The incident occurred during a six-day field exercise in May by Al-pha Company of the 440th Signal Battalion.

"They told us our tent was being fixed," Sgt. Suzan Sawyer, 25, said. "They divided off the tent with a haphazardly put up liner. You couldn't change or clean up be-cause the men could still peek

Opts for Privacy

Sgl. Sawyer, the highest-ranking enlisted woman of the group, refused to sleep in the tent with the men, opting instead for "a place that was private."
Spec. 4 Nancy Burciago, 20,

moved into the tent only after spending a first restless night in a supply van.

"As soon as I walked into the tent, even though there was a partition, I heard about five men call out my name," she said. "I like to take what we call bird [sponge] baths. But I felt uncomfortable in the tent. I wasn't really worried that the men would come over and harass me in any way. I just didn't feel comfortable having them there, knowing they could see through the sides of the partition."
The husbands of the two women,

both soldiers in the same battalion, but not assigned to the same tent, also objected to the arrangement, the women said.

A Army spokesman said that regulations call for separate sleep-ing and bathroom facilities for

DARMSTADT, West Germany, male and female soldiers in garri-July 16 (UPI) — Several female sol-diers believe that the U.S. Army in der unforeseen field conditions," men and women can be required to share a partitioned tent.

Short on Canvas

Lt. Col. Benjamin Donaldson, commander of the 440th, said that he allowed Alpha Company to establish its co-ed tent because it ran short of canvas covers.

"It was either in the [co-ed] tent or under the stars," he said. "And I

U.S. Grounds Pilot Hit by Surfer's Board

HONOLULU, July 16 (UPI) The pilot of a plane that collided with a surfboard has been grounded for five months. William Connelly was guilty

of "the worst case of low flying I've heard in five or six years of hearing these cases," said Judge Robert Boyd of the National Transportation Safety Board. He agreed with a Federal Avi-

ation Administration recom-mendation that Mr. Connelly's license be lifted for nine months, but gave him credit for four months because he has not flown since the collision. Mr. Connelly admitted flying under the FAA minimum altitude of 500 feet.

Connelly was flying over water near Sunset Beach in a biplane when Robert Fram propelled his board into the air, spearing

the plane's lower right wing.

Mr. Fram, 22, testified, "He was coming right at me below the level of a telephone pole. I heard the noise of the engine, heard the impact as I dove underwater."
The \$90 board was damaged

but Mr. Connelly refused to pay to fix it, contending that Mr. Fram had purposely shot the board at the plane.

don't think young ladies should sleep under the stars."

Sgt. Sawyer questions the tent shortage, suspecting that it may have been cooked up by male noncommissioned officers poking fun at female soldiers. She said that many non-commissioned officers ahuse the equal opportunity regula-tion by requiring women to do unreasonable tasks,

Sgt. Sawyer's assessment com-cides with that of a study conduct-ed by the Army Research Institute for the Behavioral and Social Sciences, which reported recently that male non-commissioned officers "in many cases were highly vocal in their opposition to women."

Under Protest The other four women involved all slept in the tent with the men,

but under protest "Men shouldn't be around when women have to do their personal bygiene," Spec. 4 Warner Edwards, 21, said, "I felt bad, terrible." Pfc. Karen Goode, 20, also was

"Like changing, when you go to bed and you pull off your clothes," she said. "I felt like maybe somebody would be peeping under the partition. Everybody was upset about it, but you had to face it. We had no other place to sleep. But I don't trust men.

The men on the other side of the partition professed indifference.

"The guys didn't care one way or the other," Spec. 4 Dennis Crider, 21, said, "We [men and women] through the whole field problem. It seemed like it [sharing a tent] had been going on for a hundred

Blast Shakes Houston

HOUSTON, July 16 (UPI) - A dynamite storage plant exploded on the eastern edge of Houston last night, shattering windows more than a mile away across the San Jacinto River. Police said no one was hurt because the plant had been sit-uated "in the middle of nowhere in case something went wrong."

For Individuals

Taxes: U.S. Inflation Adjustment Urged

WASHINGTON, July 16 (WP)
— Sen. Russell Long, D-La, chairman of the Senate Finance Comthe Senate in favor of a capital and more progressively structured than either of the proposals currently before Congress. mittee, has proposed that the government consider providing for the first time an automatic inflation adjustment for some federal taxes.

Sen. Long's proposal would break new ground in that there now is no inflation adjustment for taxes on individuals. Conservatives have complained that the impact of inflation increases the tax burden on earnings and capital gains.

Sen. Long suggested the move as a compromise that President Carter might consider to help ward off a major cut in capital gains taxes that seems likely to be approved by the Hnuse Ways and Means Commit-

es. But observers say that it is un-

likely to draw many votes in Ways

and Means. Nn Administration Reply

The administration had no immediate reply to the suggestion, which was raised during a hearing of the Finance subcommittee on debt management and taxation. chaired by Sen. Harry Byrd Jr., D-

The entry of the Senate Finance Committee chairman into the foray was regarded as an important development for the administration. Mr. Carter vehemently opposes a cut in capital gains taxes but has few allies in fending one off.

If Mr. Carter accepted Sen. Long's offer, he would have a pow-erful ally to help sidetrack the capital gains hill, Sen. Long earlier had indicated that he favored a capital gains cut. The proposal Sen. Long suggested would apply only to a narrow area of taxation — the method of

calculating the portion of a capital gain that might be subject to the minimum tax imposed on high-income taxpayers. However, the proposal could open the donr to consideration of inflation adjustments for other parts of the tax code, including the

rates themselves. **Half Taxed**

personal exemption, the minimum standard deduction or even the tax

A capital gain is the profit a tax-payer makes from the sale of stocks or other property. Currently, only balf a capital gain is subject to the regular income tax. So, in effect, capital gains are taxed at half rates. In 1969, Congress enacted an ex-

tra tax, called the minimum tax, to prevent persons with large amounts of tax-sheltered income from escaping payment of income taxes. The untaxed half of capital gains is subject to this tax. Sen. Long's proposal would reduce the portion of a capital gain subject to the minimum tax by ad-Dye to Warn of

justing the purchase price of an asset upward to account for inflation, thus leaving less "profit" to Although precise estimates were not available, government tax ana-lysts guessed that the Long propos-al would drain only about half the

\$1.3 billion in tax revenues that the Ways and Means measure would The full minimum tax now brings in about \$1.4 billion in revenues each year. Of this, about 86

portion of capital gains. The remainder represents modest taxes on various tax shelter income.

> Madame Butterfly did not sleep there, nor did she look out over the harbor for Lieut. Pinkerton. though, as the tourist brochures note, she could have, and that has been good enough for Nagasaki, so it has adopted Puccini's opera as

Behind the restured Glover House, at the top of the air-condi-tioned moving sidewalk up the hillside, is a bronze Madame Butterfly in kimono, a plaque and a series of wall fountains arrayed like notes in the score. The only difference between the tragic Italian tale about Nagasaki and the "real life" story adopted by Nagasaki is the begin-ning, the middle and the end— and the parts in between.

Thomas Glover was not named Pinkerton, was not an American, never in the Navy and did not leave town. He was British, arrived in 1859 and did not deal in altruism but in guns, supplying some of the warring clans that were washing over a chantic country.

Fortunately for Glover, his side won and the emperor was restored to power, in gratitude, he awarded a medal to Glover, who married his Japanese sweetheart, Tsuru, and they lived happily ever after.

tantamount to murder.

Many women have done so de-

spite a major campaign by the

church, the refusal of many doctors

to perform the operation, and a

shartage of beds so acute that in

one Rome bospital women admit-

ted for abortions were crammed

Official Figures

Official figures say 425 women in the Rome region of Lazio had abor-

tions during the first month that

the law was in effect. In the Pied-

mont region, there were 500 abor-

"I didn't feel like having a baby wbo would need a real mother and father," Lorella said. When the law Passed in parliament by Commupassed, she decided to use it and nist, Socialist and moderate parties over the opposition of the ruling church-backed Christian Demowent to a family planning group for the necessary medical certificate. Even if a doctor had decided her crats, the law allows a woman over case did not meet the requirements, 18 tn seek abortinn for physical, economic, social or psychological reasons during the first 90 days of the decision would have been left to her after a seven-day wait.

She then took a blood test at a neighborhood clinic and went to Rome's Policlinico Hospital, the crowded university center whose walls are plastered with slogans denouncing doctors who have declared themselves conscientious objectors and refused to perform

Many nurses have refused, too, and in the Policlinico feminist groups have taken their places, helping out in the 11-bed abortion

After a three-week wait for a bed. Lorella had her abortion in the first week of July. During her threeoccupied and at times several beds said the sheets were clean, the doctor efficient and "it was safe and

A big problem for those wanting abortions is that the church urges doctors and nurses to sign up as objectors — they must do this to avoid having to perform the operation — and warns that anyone con-nected with an abortion, from the woman to the attendants, faces excommunication. In the Rome area, 76 percent of obstetricians and gynecologists have registered as objectors, the local health office

Hundreds of women in Trieste recently occupied the regional health office complaining that women cannot get abortions or have to face long waiting lists be-cause only one doctor in that city of 200,000 is willing to perform the operation. In Nuoro, Sardinia, women marched to protest the fact that not one doctor was available.

Family-planning groups have suggested that the law be altered to allow private abortion clinics as in the United States and northern Europe. On the other hand, a group called European Social Democracy wants to overturn the law by national referendum and has filed court papers announcing its intent. A similar referendum four years day stay, she said, every bed was ago failed to annul Italy's divorce law in a defeat for the Vatican.

pair of parliamentary by-elections in the heart of England last week has given no comfort to any of the Conservatives, compared to the 1974 general election. A national

of Commons. But all sorts of influences could bave accounted for that swing, in-cluding an unusually low turnout and a general grumpiness caused by a cold, wet summer.

The swing to the Tories was even greater in the other district. Penistooe, a Yorkshire hill and mining area that is heavily Labor. They gained 8.8 percent on Labor there. Yorkshire miners have been more critical of Labor's economic policies then have the union mark and

cies than have the union rank and file. The Winners

The winners were George Mor-ton in Moss Side and Allen McKay in Penistone. They will replace members who died recently.

This might be the last test voting before a general election. The best guess is that Prime Minister James Callaghan will call the election as early as October, in spite of Thursday's uncertain results. Technically, he could wait until the fall of next

One of Labor's fears is that the

Liberals, whose 13 members of Par-liament have been politically dam-aged by making a voting pact to give Labor a working majority, will collapse at the polls and lose their voters to the Tories. Thursday's voting showed them down from 1974, but holding on with more te-nacily than had been expected. The Liberal candidates ran their customary third and finished far ahead of the splinter parties, including the Wnrkers Revulutionary Party whose candidate, the actress Vanessa Redgrave, got 394 votes at Moss

Burma Refugee Flow Continues Unabated

DACCA, Bangladesh, July 16 (UPI) — The flow of Burmese Moslems into Bangladesh continues unabated, with about 2,000 having made the journey the week after Rangoon and Dacca signed an agreement for repatriation, relief officials said today.

The officials at the refugee control center in Chittagon, southeast of Dacca near the Burmese border, said that during the same period 1,413 people died in refugee camps and there were 644 reported births. Autonomy Remains the Issue

Spain Critical of Police After Basque Disorders

By Jonathan Kandell

SAN SEBASTIAN, Spain, July 16 (NYT) — Disorders that sbook northeastern Spain last week have confirmed the Basque region as the biggest political problem of the democratic government that emerged after the Franco dictatorship.

The incidents bave led the na-tional government to criticize police action in the Basque region, an official attitude inconceivable during the Franco era. The government has ordered the police not to interfere if demonstrations resume in the Basque country. The police commanders were removed in Pamplona and San Sebastian, and a captain who led a police rampage in Renteria was suspended.
[The Spanish Cabinet dismissed

the governor of Pampiona's Navarra province Saturday and increased the home rule powers of the Basque General Council, UPI reported.

The council is to have wider powers in agriculture, industry, commerce and city planning. Eduardo Ameijide y Montenegro, governor of Ciudad Real province south of Madrid, replaces Ignacio Llano in Pamplona.)

An uneasy calm returned Friday, amid unabated demands among the Basques for greater autonomy from the national government and for the dismantling of a police force that they regard as a repressive army of occupation.

Autonomy Talks

"Our people are convinced that their common enemy is the forces of public order - and that they should be made to leave," said Juan Maria Bandres, a Basque senator who is considered a moderate.

The disorders coincided with parliamentary negotiations in Ma-drid for a new constitution spelling out the limits of autonomy for the various regions, including the four Basque provinces of Guipuzcoa, Vizcaya, Alava and Navarra.

In the weeks before the current crisis, terrorists who advocate complete Basque independence had stepped up shooting attacks. Apprehension was high among rightwing police officers who oppose even limited autonomy for the region. The recent upheavals appear to have helped both extremes by making it more difficult for Basque moderates to support autonomy as restricted as that which the new constitution might offer.

The disorders began on July 8 during the "running of the bulls" festival in Pamplona, when Basque separatists and right-wing Fran-coist youths clashed, and police starmed into the melce. A Basque youth was shot dead.

Police Riot

Protests quickly spread to other Basque cities. In San Sebastian, a youth was killed by police on Tues-day. On Wednesday a general strike shut businesses in most of the region, and barricades and bombs cut key highways and rail-

On Thursday, after demonstra-tions had subsided, a 200-man po-lice force ransacked stores in the town of Renteria, in an apparent and at one point - Wednesday in town, a grimy industrial communi- streets.

A truck set on fire by the p lice partly blocked the main roa by the harbor.

Government 'Skeptical'

Police said that gun-wielding demonstrators tried in attack polic stations. But Interior Minister Redolfo Martin Villa cast doubt o police explanations of the killing c the two Basque youths.

"There are some points I ar skeptical about," be said at a new conference. They include whether there ever was an assaul on a police station and whether there was any shooting from the demonstrators."

The abysmal relations between the police and the Basques date from the Franco era. Armed resist ance led by an organization known as ETA — the acronym for Basqu Homelands and Liberty — conun ued throughout the dictatorship and political and cultural repres sion here was particularly strong.

There are prohably more docu mented cases of political tortun here during the Franco era than ir other Spanish regions. Franco poli cy was that Civil Guard personne should not serve in their home regions. They and other police iso lated here feel like an occupation

Internal Strains

The disorders of the last few days have accentuated calls fo dispersion of the national police and formation of locally recruited security forces. Separatist demands have also

increased, although there are broad differences between extremists and moderates on the definition in autonnmy. ETA, which has per haps 100 armed terrorists, advo cates a virtually independen nation. Only a minority of Basque are consistent ETA supporters, bu sympathy for the group mushowm during incidents like the recen

The mainstream Basque politica group, the Basque Nationalist Par ty, has been vaguer about autono my. Observers say it might accept a constitution that gave the region approximately the police, taxation and political powers that a state enjoys in the United States.

The tensions between Basque extremists and moderates were evident even during the last few days. They held separate demonstrations

Mobutu Frees Ex-Aide Nguza After 10 Months

KINSHASA, Zaire, July 16 (AP)

Nguza Karl-I-Bond, a former
Zairian foreign minister, has been
released after serving 10 months of a life sentence for treason in the 1977 rebel invasion of Shaba prov-ince, Zaire's official news agency reported today.

Agence Zaire Presse said Mr. Nguza, 40. appeared in good health when he stepped off the military transport returning him to this capital Friday night with other political prisoners freed under a general annesty declared by President Mobutu Sess Seko. He had been in custody in southern Zaire. There had been reports from

anti-Mobutu exile groups in Belgi-um, this nation's former colonial ruler, that Mr. Nguza had died in custody from lack of medical attention. But AZP said he had been kept in a "golden jail" and received \$1,200 a month worth of food and medical care. He was condemned medical care. He was condemned to die last September by the Zaire supreme court. but Mr. Mobutu quickly commuted the sentence. He was found guilty of failing to give the president advance informa-

tion he allegedly bad about the March, 1977, invasion by exiled tribesmen of the copper-rich southeastern Shaba province.

Military Candidate Is Apparent Victor

By Charles Krause

LA PAZ, Bolivia, July 16 (WP) — With about 77 percent of the votes counted, Juan Pereda Asbun, the official candidate of Bolivia's military regime, has emerged with a majority in the July 9 presidential

It appears almost certain that Mr. Pereda will be inaugurated as Bolivia's first elected president in 12 years, replacing the retiring Gen. Hugo Banzer.

The Elections Court suspended all vote counting Friday — six days after the election — for the long holiday weekend celebrating the frunding of La Paz. Mr. Pereda led with 50.6 percent. His party also won a majority in Congress, which will elect the new president if no candidate wins a majority of the

Opposition party leaders and diplomats had hoped that Mr. Pereda would not receive an abso-Inte majority of the 1.8 million votes cast because of widespread ir-regularities and apparent vote-counting fraud, which, in the eyes of many Bolivians, human-rights groups and the Carter administraion, has invalidated the election.

While there is little doubt that Mr. Pereda would have received a plurality without fraud, it is generally helieved that the military, which indirectly controlled the election machinery, stole the votes necessary to give Mr. Pereda a majority to avoid a parliamentary runoff,

The slow counting procedure and the increasingly obvious indicarions of fraud - including more votes counted in two of Bolivia's departments than there were regis-tered vnters — have created tensinn that some observers believe may explode into violence as the Aug. 6 inauguration date draws closer.

The handling and outcome of the election pose a dilemma for the Carter administration, which had hoped that the return to democracy in Bolivia would set an example for Latin American military

If the Bolivian military gets away with a fixed election, without much U.S. reaction, other Latin military

A Little Bit of Censorship

hounding the gnats of dissidence with clubs and cannon ought to remind us that there is no such thing as a little bit of repression. As they showed again in the farcical trials and brutal sentencing of Anatoli Shcharansky and Alexander Ginsburg, the Russians no longer shoot their dissenters but merely cart them off to Siberia. As they will demonstrate in a further farce this week, they no longer censor the dispatches of foreign reporters but merely bring them to court on charges of slander. They no longer haul ordinary folks out of bed for telling a bad joke or composing unorthodox music but merely suppress all unapproved communication and terrorize people with threats of economic deprivation and social ostracism. A tyranny can be more or less tolerant; it cannot cease to be a tyran-

We raise the subject not to belabor a bankrupt Soviet ideology but to see what instruction we can salvage for ourselves. As many have shrewdly observed, there are some unavoidable similarities in the behavior of huge bureaucratic societies. The pressure to disperse some authority in Soviet society has coincided with a slow concentration of au-thority in the United States. We can learn from that, even though there is no symmetry there. Soviet power rests on the premise that a self-perpetuating hierarchy must be the final arbiter of everything — an orthodoxy. American government derives its power only from the consent of the governed - from an amalgam of diversity.

Orthodoxy carries its own imperative: Someone must define it. What distinguishes democracies is that they have no such someone. So they must suppress the occasional, and understandable, temptation to define what is orthodox. Nazis must be left to march not because they are acceptable but because we trust no one with the definition of what is. A burst of dirty words on a radio broadcast should not be the cause of government censure because no single authority can be trusted to label ideas as indecent.

Yet a recent Supreme Court majority of five thought that reasonable people can draw a line somewhere -if only for the sake of the children. Indeed, too many of our recent Court majorities have been searching for a "reasonable" outer edge of orthodoxy, loosely offering such unargued propositions as that broadcasting "has the most limited First Amendment protection" and that what most people would regard as offensively filthy words "surely lie at the periphery of First Amendment concern." Limited? Periphery?

Looking over the current Court's struggle

Its obligation is not to search for reasonable definitions of the acceptable or orthodox but to diffuse the power of those who pretend to the job. Let the many decide, and a few will offend the rest. But let a few decide, and the many are sure to be deprived.

Out of an unwarranted concern that some newspaper or citizen might destroy evidence bearing on a crime, the Court has granted magistrates the power to authorize police searches of the premises of citizens not even suspected of wrongdoing. On the unproved proposition that the media inflame their communities against fair trials, judges are sealing the doors on legal proceedings, gagging lawyers and prosecutors and forcing reporters to become witnesses in the cases they cover. On the theory that the media are insensitive to the rights of privacy and reputations of prominent citizens, the Court has been whittling away at its own definition of a "public person" who must demonstrate malice before he can charge a libel. In the name of protecting secrets, the censorship of books criticizing government has begun. The unspoken assumption behind this drift is that the media have grown too big and too "pervasive," and besides, who elected them to speak more loudly than anyone else? It is a superficially beguiling question to which there are basically two answers.

One is merely pragmatic. The market of the many elects the sources of its information. Not just the prudishness of an editor keeps dirty words off this page. Nor is it only the conscience of a broadcaster that directs his coverage toward the broad middle ground of public interest — and prejudice. Surely the courts have heard of the fate that awaits a television producer against whom the Nielsen ratings jury turns thumbs down.

A better answer lies at the heart of our ideology. It is the purpose of the First Amendment to assure that no authority, no matter how democratically chosen or widely applauded, is entrusted with the job of censor. The sensibilities of children, the rights of defendants, the imperatives of national security — all lend themselves to convenient justifications for censorship. Surely there are less offensive ways to protect the community: Secrets can be guarded; nuisances can be zoned; movies can be X-rated. But there is no such thing as a little bit of prudent censorship. Censoring requires a censor. It is the ultimate orthodoxy of our democratic faith that no one is fit for the job.

Young provided the inspiration, and his deputy, Donald McHenry, did the heavy negoti-

Where Carter Miscalculated on Rights

William Pfaff

PARIS — When President Carter launched his buman rights campaign at the beginning of last year, be scarcely could bave imagined the situation be finds himself in today. A hardened Soviet policy dissenters now has sentenced one of them, Anatoli Shcharansky, to 13 years in prison and another, Alexander Ginsburg, to eight years. Allegations of espionage and criminal dealings are bruited about others. U.S. newspapermen and businessmen are harrassed in Moscow. And the Carter administration searches for something effective to searches for something effective to do about all this.

But Secretary of State Cyrus Vance says that the SALT talks are too important to be jeopardized. Reprisals against the Russians in trade and technology exchanges are talked about, but even if they were adopted, no one really expects them to change the way the Russians are behaving. The United States has provoked a crisis which it is powerless to resolve on any but

failed to understand that the Comliefs and serious about power. The Soviet Union is a state with an official ideology which claims to provide a scientific explanation of his-tory and of where history is going. even the brightest stars. President Carter pr It claims to provide the truth about social and political struggle.

There may be Soviet leaders today who doubt the truth of Marxism-Leninism. If so, they nonetheless must act as if they believe it to be true. The Soviet system is built upon the assumption that a single, correct explanation exists for every political question.

Because Soviet ideology is held to be true, those who challenge it— the dissenters— are by definition wrong. In fact, because they are challenging what is supposed to be scientific truth, they may be thought irresponsible, in need of medical treatment. It is not an accident that dissenters in the Soviet Union often have been forcibly treated, or imprisoned, in psychia-tric hospitals.

Such people may also, of course, simply be foreign agents. This is, for the Soviet leaders, the most satisfactory answer as to why writers and scientists, some of them eminent people, should deliberately threaten the established order. But the Carter policy of backing

the dissenters seemed to assume that the leaders of the Soviet Union do not really believe in the truth of their own system. It seemed to assume that underneath it all they really are open to the notion of free debate and controversy, and that if the merits of the free system were explained to them clearly enough they eventually would bave to ac-knowledge that the Western system really is best and would stop per-secuting their intellectuals.

'Objective' View

Instead, they took Carter's interventions as subversive interference in their affairs. And they concluded that their dissenters were no mere domestic nuisances but that "objectively" they had become the agents of a foreign threat. Marxism is very clear on "objective" historical roles. as opposed to the subjective intentions of those acting out those

President Carter presents the wage line against the unions without tearing the fabric of Britain's most obvious case in point. Nothing very bad has happened during his presidency. But his stock has dropped steadily here and abroad. can get by the annual meeting of his Liberal Democratic Party this

National Mood

Why? Chiefly because of a nanonal mood that accentuates personal satisfaction and disparages public action. Mr. Carter invoked that mood in winning office by an assault on Washington insiders. Now be finds no response to his strident calls for action against inflation, or the energy crisis, or an unfair tax system. So he looks weak and indecisive, and at Bonn has been on the defensive. Helmut Schmidt, the host at

Bonn and the other leader who moved ahead rapidly on his own, has enjoyed far more success and public favor. The Social Democratic chancellor has stopped inflation cold, kept unemployment relatively low, and made his country an object of elaborate courtship from the United States, the Soviet Union

and the rest of the world. But the essence of his domestic policy has been mean-spirited resistance to proposals for social reform and economic justice. The opposition Christian Democrats now threaten to one-up him with a proposed tax cut. That exerts a powerful appeal on his coalition partners, the Free Democrats. If local elecrions go badly next fall, the coali-rion could fall apart, thus paralyzing the chancellor and compromising bis chances for winning the t980 elections.

The two golden boys also bave suffered from a tack of public spiril. President Valery Giscard d'Estaing won a great electrial victory when a leftist coalition of Socialists and Communists lost the French legislative elections in March. But in the interest of lighting inflation — and staying on good terms with the Germans — he has had to jetti-son hopes of reforming France's truly outmoded social structure.

In Canada, Pierre Elliott Trudeau failed — because of resistance The other thing Carter failed to from business and labor - to masprobably save himself only for a year against the challenge of rivals supported by other factions in his

Deadly Embrace In Italy, Prime Minister Giulio

Andreoth would like to free his Christian Democratic government from dependence on Communist support. But the election of a Communist-backed Socialist, Sandro Pertini, as president of Italy shows how hard it is for the Christian Democrats to shake the deadly embrace. Why? Primarily because the Christian Democrats refuse the self-purge that would enable them to stand up as a clean, modern party with mass appeal to a majority of Italian voters.

So despite considerable personal qualities, no leader of the advanced countries can look forward to a ginrious future. Conditions beyond their control — namely, the absence of crisis and of a self-evident need for sacrifice — do not afford the scope for greatness."

EDINBURGH — When demonstrators, threw horse manure into the House of Commons on for the moment.

Nationalism Rising

Scottish Devolution:

What It Is and Isn't

By Neal Ascherson

July 6 the subject under debate was

Scornish devolution. There is no significance in that. It would, in fact,

have been quite hard in the past

two years to catch members of Par-

cated piece of legislation ever un-dertaken by a British government.

cials like to suggest to visitors that devolution is at once too complicat-

Not Federalism

Devolution is not federalism. Scotland and Wales are being of-

fered sub-parliaments, or assem-blies, with some internal local pow-

ers but no right to raise their own taxes. A federal system would have given the assemblies powers by right, under a constitution. But de-

volution is just a lending of powers.

moment resolve to abolish one or

both assemblies, and cancel their legislation. As the veteran rightist politician Enoch Powell puts it, "Power devolved is power

Those are fair statements. By they coaceal the turmoil of Scotti politics, now in a very curious per od. On the one hand, support for the Scottish National Party is declining. The SNP, standing for total independence and separate Scottish membership in the United Nations, gained 30 percent of the vote four years ago, but in recent? months has been to slide out of liament debating anything else but Scottish devolution. One bill on the subject failed last year. Now a second bill is almost through all its tortuous stages, the most complimonths has begun to slide out of public favor. But, and paradoxical y, interest in independence and in the assembly version of autonomy seems to be increasing. So the Scots are becoming more attracted to various notions of self-government but less impressed by the party which originally made these notions popular. There are three questions that generally get asked about devolu-tion. For some reason, British offied and too embarrassing to explain.
Not so. Let's give plain answers to
the three questions: What is it, do
Scottish people want it, and if so,

There are Scottish reasons and European reasons for the unexpected appearance of nationalism in Scotland, just as statesmen are working on supranational instinutions in the world at large. Scotland was never as closely united with. England as it appeared, and the Union Treaty of 1707 left the Scots their own legal and educational systems and their own church. They lost their parliament, but informally ran their own affairs until well into the 19th century.

Then came the era of interior into the 19th century.

Then came the era of interior conist government, as London be gan to regulate the very details of Scotlands industrial decay. From

In Britain, Parliament is not al-lowed to share its sovereignty. In theory, Parliament can at any Scotland's industrial decay. From being the proud little country that led the engineering side of the in-dustrial revolution. Scotland deretained."
Opinion polls suggest that most
Scots will accept this scheme. The clined to a dark corner with the worst slams in Europe, the worst teeth, lung cancer and coronary heart disease — and some of the polls also suggest that they would have liked something more, a stronger assembly which could tax loveliest scenery.

The discovery of oil deposits in the Scottish sector of the North Sea came when political nationalism was already rising. It did not create it, but underpinned the SNP's claim that Scotland will be better off out of Britain off out of Britain.

Wider Trend

In the wider view, what is hap pening in Scotland is much what is happening in several parts of a Europe, where long-buried na-tionalities are reasserting them. selves against over-centralized gov-

ernment.
The Basques and Catalans in Spain, the Occitans and Bretons and Corsicans in France, also talk about "cultural colonialism" or about escaping from the womb of a

bigger but more reactionary state.

There is something of the "self"
management" dream of 1968 in
this, and something of the "small is! beautiful" ethic, too. But the real reason is that Europe's economic and social development is still so patchy. Submerged nationalities often correspond to regions that feel neglected and would prefer to tackle their own economic and social problems directly. And this is where the paradox of nationalism emerging in the period of supranationalism is explained. Once the state begins to be dissolved from above — by integrated alliances like NATO or by economic associations like the Common Market — the regions find the courage to start reason is that Europe's economic the regions find the courage to start

French in Canada Despite the provincial govern-

ment's French-language services, Hobart Rowen (IHT, July 4) suggests, "there is little sympathy in much of Ontario for bilingualism." Oddly enough, bowever, the least sympathetic group includes many working-class Franco-Ontarians, who regard competence in French as an obstacle to social mobility, their own and especially their children's. They belong to a group which Anglo-Ontarians wish neither to exterminate (genocide) nor to assimilate (ethnocide) but simply to exploit; and exploitation is ensured by the coexistence of a dominated with a dominent language. Work done by the Ontario Institute for Studies in Education tends to support the principle that "any at-tempt to reconcile diversity and equality within a purely linguistic framework will fail." Members of a dominated linguistic minority seem to be caught in a double bind. Do such efforts as those of Ontario's premier tighten the bonds? Anyway, Franco-Ontarians cannot be wined out - for that to happen they would need to be Eskimos or

Amerindians. Though it may be rude to say so. British rule bas triumphed in Canada because there at least its underlving sadomasochism has been kept under control. When in the 1850s, in India, a Delhi subaltern kicked his Indian groom to death, the newspapers condoled with him for the shock it all must have

caused him. But such attitudes, though consistent with themselves, led to the Indian Mutiny. In Canada, on the other hand, resentment of British begemony serves mainly. suspect, to distract the French fraction from the struggle against multiple U.S. takeovers. All Canadians (indigenous peoples included) are condemned to what Austrian Marxists used to call Schicksalsgemeinschaft: a collaboration imposed upon all classes by their

space they inhabit together. Must the fate of the French in Canada continue to be shame tempered by affluence (or the

Seventy-Five Years Ago July 17, 1903

NEW YORK - Farmers in desperate need for extra labor to harvest their crops boarded a train near Otis, Kan., yesterday, and shanghaied a group of students who were on their way to belp with the harvest in another town. The group of students, which included several sportsmen, put up a worthy fight, but because of the early hour most of the students were asleep and did not know what was going on until they found themselves on the platform with their captors.

In the International Edition Fifty Years Ago July 17, 1928

NEW YORK — East Coast farmers are hoping the reverse of the legend of St. Swithin's Day (July 16) will hold true this year. The legend says that "if it rains on this day it will rain the next 40 days." But yesterday dawned bright and clear over most of the East Coast, in contrast to the unusually rainy last two weeks. The rain has damaged Eastern seaboard crops, including Long Island and New Jersey cherries, strawberries and apples, and New Jersey onions.

Congress at Critical Point In Battle on CIA Reforms

By George Lardner Jr. WASHINGTON (WP) — Two years ago, when David Atlee Phillips and like-minded defenders of the CIA set out oo the college lecture circuit, they were routinely confronted by hecklers and protest-ers denouncing ibem as assas-

The climate has changed. The investigations are over. The recriminations have subsided. The apologists have turned into advocates, urging, even demanding, a stronger hand for the CIA and the rest of the intelligence community despite the record of abuses.

the record of abuses.

"There's absolutely no question about it," said Mr. Phillips, the founder and past president of the Association of Former Intelligence Officers. "A lot of people are saying, 'Gee, the agency bas won.' Well, I'm afraid we haven't won. But we have entrived." But we have survived."

They may yet be able to claim victory. The CIA — and its congressional overseers, who were first organized in 1975 to cope with dis-closures of illegal domesoc spying and other misdeeds - are now at a crucial juncture.

A comprehensive piece of legislation, the National Intelligence Re-organization and Reform Act of 1978, (S.2525) bas been drafted and debated at Senate hearings for months now, but all sides dismiss it as nothing more than a talking

paper, a starting point.
Sen. Frank Church, D-Idaho, who was chairman of the original Senate Intelligence Committee and its unprecedented investigations, thinks it is already too late.

'Memories Short'

"Reforms have been delayed to death," he said, "This has been the defense mechanism of the agency, and it could easily have been foreseen . . . Memories are very short. think the shrewd operators, the friends of the CIA, recognized that time was on their side, that they could hold out against legislative

Other senators, members of the present committee, such as Walter Huddleston, D-Ky., and Charles Mathias, R-Md., are more optimistic and insist that a new legislative charter for the intelligence community will be passed, probably next year. They point out that the Carter administration is, after all, commit-

But there is increasing uncertainty as to just what kind of intelligence reforms could get through

administration will support. The house, tensions over Africa, the recriminations with the Soviet Union over spies here and there and other signs of what the Russians have called "a chilly war," could, officials agree, produce a stiffer line from the

"We're at a critical period right now," said Senate Intelligence Committee Chairman Birch Bayh. D-Ind. "There are significantly more questions being raised in the executive branch right now about the future of [congressional] ovesight than there have been in the past. That's why I say we're at a

very delicate stage right now."
Sen. Bayb indicated that he was speaking of administration concern over some recent news leaks about actual and proposed covert operaoons, which must now be reported to Congress, however vaguely.
"The whole matter — charters,

oversight and everything — I think is going to rise or fall on the [congressional] security question," Sen. Bayh said. "If we cannot convince the president that we can handle this information securely, he's not going to give it to us for oversight, and he's not going to continue to support charter legislation that forces the intelligence agencies to give it to us for oversight."

Troubling Catch

There is also a troubling catch to that proposition, Sen. Bayh said. Officials of every administration have been known to leak secret tidbits of information from time to time themselves. That is still hap-pening, Sen. Bayh believes.

"Now what ax they're grinding and whether it's to release informa-tion so that when it hits the papers, they can say, 'Well, look, this is what happens when Congress gets it,' I don't know," he said.

A chief target of the U.S. intelli-gence establishment is the law under which the president must notify Congress of the CIA's covert operaions - which would be euphemistically renamed "special activities" under S. 2525. Repeal of the Hughes-Ryan Amendment, which Congress adopted in 1974, stands at or oear the top of any CIA offi-cial's legislative "wish list." Uoder Hughes-Ryan, covert ac-

tions in foreign countries can be undertaken only if the president finds each such operation import-

Pasi and present CIA officials have denounced the provison as a disaster, although most of the leaks for which Hughes-Ryan is blamed prohably would have occurred any-

way. Former CIA Director William Colby, for instance, believes the House Intelligence Committee headed by Ous Pike, D-N.Y., was mainly responsible for the fact that "every new thing even [covert action] that I briefed Congress about during 1975 leaked." But the Pike committee, like the

Church committee, would have gotten that information anyway, dur-ing its congressionally mandated investigations, even if Hughes-Ryan had never been passed.

The committees' successors, the permanent Senate and House Inteligence Committees, would continue to get that information even if Hughes-Ryan is repealed. Only the three other committees in each house, Appropriations, Armed Services and Foreign or International Relations, would be cut off.

Still, repeal of Hughes-Ryan bas become a goal for the intelligence community in the legislative battles that lie ahead.

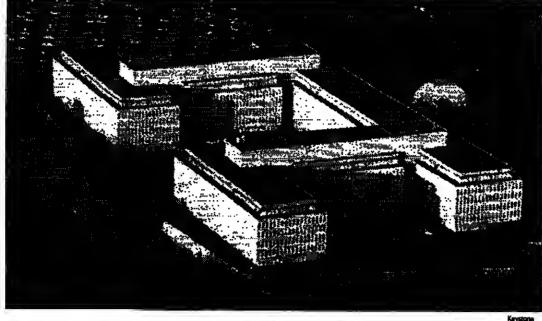

"Four committees in each house is absurd," Mr. Colby said. "The breadth of the reporting makes it much less of a secret, more of a topic of conversation.

For the intelligence agencies, other goals — and potential signs of who wins, who loses - include passage of a law that would make it a felony for intelligence officers, past or present, to reveal a secret, and of a statute that would give the CIA more, rather than less, freedom to undertake covert actions.

"There's been a failure oo the part of the administration and Congress, in particular, to start off with first things first, which is to define the nature of the threat," said James Angleton, former CIA counterintelligence chief and oow chairman of the Security and Intelligence Fund.

Once you define the threat, you can come up with rules and regulations to confine the threat. That way, you can get rid of all this adversary business [with Congress and the courts] brought in by the

At present the rules governing U.S. intelligence agencies are emant to the oational security" and re-ports it "in a timely fashioo to the President Carter issued in January. er to do them, with all the flexibiliappropriate committees of the It cootains various prohibitions ty he had before.

The CIA headquarters in Virginia

and restrictions on covert operations, including a ban on assassinations. Criocs such as the Center for National Security Studies have complained that it also leaves the door open for extensive surveillance without a warrant, including hreak-ins, directed against people in this country.

"The order contains the most explicit and far-reaching claim of an nherent presidential right to intrude without a warrant into areas protected by the Fourth Amend-ment ever stated publicly by an American president," said the center's director, Morton Halperin.

Designed as a temporary charter. the executive order was written in close consultation with the Senate Intelligence Committee, which then introduced the proposed National Intelligence Reorganization and Reform Act. It would put the U.S. intelligence

community under a new director of nacional intelligence and restrict a wide range of abuses such as burglaries, mail intercepts and drug experimentation. Slightly stronger than Mr. Carter's executive order and

stitched together with an array of

reporting requirements, it has also been assailed from all sides. On the one band, the American Civil Liberties Unioo regards the bill as "very close to being worse than oothing," said ACLU legisla-tive counsel Jerry Berman.

The bill broadly authorizes covert operations, paramilitary opera-tions and intrusive investigations of American citizens," he said. "It takes away the inherent power of the president to do those things,

The Security and Intelligence Fund sees it differently. Mr. Angleton considers the bill the product of a leftist cabal, an "altogether familiar company of wreckers" led by "arch-liberal politicians" such as Vice President Mondale.

S. 2525, the Fund said is "so S. 2525, the Fund said is "so drastic in its language, so summary in its authority, that it will, if adopted in anything like its present form, leave the two principal intelligence agencies — the CIA and the FBI — all but impotent as far as coping successfully with subversion, espionage and terror is concerned."

"I don't think the president has shown any leadership in the matter," Mr. Angleton added. Instead, be said, Mr. Carter has left it to Mr. Mondale, whom the fund describes as Sen. Church's once "ardent lieutenant" on the Senate Intelligence Committee, and to Da-vid Aaron, Mr. Mondale's former Senate aide, who is now deputy White House assistant for naconal

In any event, congressional sources say that Mr. Aaron's boss at the White House, Zbigniew Brzezinski, has shown no interest in the subject.

However, in a recent article in The New Yorker, Mr. Brzezinski has not only expressed concern about the restrictions placed oo the CIA as a result of the disclosures of recent years, but he is also troubled by the number of reviews required for certain operations. And he is said to think that Mr. Carter ought to have "deniability" - that covert actions should be carried out in such a way that the president could disclaim them instead of being beld accountable for them.

Former CIA Director Richard

Helms said that he has heard various accounts of where the administration stands on the issue of intelligence reforms and is not sure

Administration officials, however, say a close watch is being main-tained by a special interagency group that has been going over the bill for the National Security Coun-cil at regular meetings in the offices of the director of central intelli-

argue against anything that departs from the structure of the executive order, to hold out for more flexibility and less restrictions on covert

The Senate bill defines covert acoon "in such a way that you'd have to rule out a lot of things done today," a source said. Under S. 2525, such operations would have to be "essential to the conduct of the foreign policy or the national defense" and not just "important to the national security," as present law requires. The administration's professed

reservations, however, are so extensive that its intelligence experts will probably produce a counterdraft to out of an interview, and left to give the impression that I did not underon the House to insist oo a more conservative tack. A preliminary test of sentiments

in the House is expected this summer, when a bill to control natiooal-security wiretaps and bugging in the United States by judicial warrants comes up for a vote.
Originally part of S. 2525, it nar-

rowly escaped premature death last month in a House Judiciary subcommittee where bberals and conservatives alike were hoping to

Accepts Carter Rebuke

Young Explains Geneva Remarks

Although the storm over his remarks in the French daily. Le Matin, last Wednesday, about poliocal prisoners in the United States seriously embarrassed President Carter and confirmed many in their impression of Mr. Young as careless and irresponsible, it was in part ameliorated by the good news form southern Africa. The South West People's Organization bad, it seems, finally accepted the West's plan for peace in Namihia, the tyncb pin of black-white confronta-

tion in southern Africa.

I found Mr. Young near midnight on Friday in his Geneva botel dispirited and gloomy. He talked extraordinarily slowly and carefully picked out every word as if he were shopping in a delicatessen. By 2:30 a.m., although tired, he was obvi-ously more self confident. For Mr. Young, talking aloud in interviews and speeches is an important way of working out his thoughts. His amendments to the interview next ay were minor.

Yesterday morning, he seemed back to his old self. Although Mr. Carter's press spokesman, Jody Powell, had said that Mr. Carter had used the occasion to caution Mr. Young, Mr. Young found the conversation reassuring. He told me that Mr. Carter had told him not to worry.

POWER - How did you take Mr. Carter' rebuke delivered by Mr. Vance following your remarks suggesting there were hundred even thousands of political prisoners in the United States.

YOUNG - I accepted the rebuke. I understood that it was upsetting to have that remark lifted out of an interview, and left to give stand the significance of the [Anatoli] Shcharansky trial and that I was oot in accord with the strong feelings that had been expressed by President Carter, Secretary [of State Cyrus] Vance and others. But looked at in its full context I was trying to address the trial of Shcharansky in such a way that it was not just an anti-Russian com-ment. Remember I was communicating to a leftist French newspape whose readership would tend to discredit any critique made by the Americans on the grounds that we are just playing domestic pobtics or that this is just another chapter in

A critique of the Soviet Unioo becomes stronger when given from the prospective of having faced up to U.S. weaknesses and imperfec-

I am sure Europe doesn't understand this, but I think our experiment in America in open discussion of foreign policy is the only way to get important and controversial things done in our American sys-

Q. — You look a hit low and obviously feel a bit low, the criticism made of you hurt?

Criticism Hurts

A. - It hurts, only because I am anxious over the possibility of having hurt my country or President Carter. But I still believe that most of the things that I have been criticized for were right and in the long run one of these days, maybe a year from now or so, it might be nice to go back and recall some of the scandalous headlines. I think you will find that a lot of them were pretty accurate and at the time served some purpose.

Q. — Really thinking about it. how did you make a mistake like

A. - I think the mistake was to get caught up in the intellectual challenge of an interview. Also doing an interview in the midst of a very busy season with realizing that the interview would probably be published on the very day that Mr. [Soviet Foreign Minister Andrei] Gromyko and Secretary Vance would be in Geneva. And when there would be an international press corps present with nothing to write about because there wasn't a great deal to talk about as a result of the SALT talks, so they were hanging about doing nothing when this story broke. I did not anoci-pate that. I dld not anticipate either that this would be in the middle of the Shcharansky trial, the interview was not basically about Shcharansky - that came up in the middle. Q. — Can you really afford to

have such a high responsibility in government and be quite so care-less? A. — I think that is for some-

body else to decide, I don't know that I could have controlled the fact that the interview came out in French and most of the reporters in the American press corps did oot read French so they got hasty copy from the wire and never bothered to read the interview before they wrote their stories. Q. - Let's get back to the partic-

ular accusation you made about political prisoners in the United States. Sen. [Barry] Goldwater was quoted as saying you were a liar.

A. — I would say that I try to respect Sen. Goldwater even though we disagree, and I am even terests too.

GENEVA, July 16 — Last week pleased that on rare occasions I can was very much a mixed bag agree with some of the things that for the U.S. Ambassador to the he said. But Sen. Goldwarer United Nations, Andrew Young, wouldn't vote for a civil rights bill or a voting rights act that would give me the right to vote as a citizen of the United States in 1964 and 65. But an opposition bas the luxury of being able to be critical, and I think it's his duty to make political issues of anything he can in the in-terest of his party. It accept that as part of the political game.

> O. — But it was more than that Many people, including of course Carter, felt you overstated the case.
>
> A. — The overstatement was there and I guess it was particularly bad to equate the Soviet system of justice with the system of justice in the United States. I don't think those two can be equated. The point I was making in the interview was that the process of buman rights development in societies can be similar even when the societies are different. The point that I thought was relevant to a left-wing audience, whether in Paris or Soviet Union was that even in a society as oppressive as the Soviet Union the very presence of economic security created the desire for more free-

> Q. — You did say at the beginning of that answer that you probably had overstated the amount of people who are political prisoners in the United States. A. — I didn't overstate the num-

ber of people. It was a casual state-ment which perhaps should not have been made, especially not at this time, and I'm reluctant to discuss it now. But I assure you that I'll come back to the question of what is a political prisocer in the United States.

Q. — The London Times said in an editorial today that your main problem is the "unthinking casual-ness" of your utterances. The other hig blow up around your remarks was the one of Cuban troops. That too came out in bits and pieces, -and looking back do you feel you could have avoided a lot of the crit-icism if you had taken the opportu-nity to set it in a full, detailed and sober context to begin with? A. — Yes, but oobody would

have paid any attention to it.

O. — So there is a conflict between getting attention and being

A. — No, there's a conflict between being free and being frightened. I guess the only way I can face life is to live it and to enjoy it and to be open, and if I can't be that I don't want to be anything. I am naive enough to believe that's the American way.

Q. — Strangely enough, one of your goals, an internationally accepted solution for Namibia, a country which for the last few decades has been run by South Africa. looks as if it's in sight of solution. Yet this has been brought about by a very quiet diplomacy. In fact most people probably don't know that Namibia exists. Doesn't that perhaps tell you that maybe without realizing it you are sometimes at your best when you are being quiet diplomat?

Candid. Honest

A. - I don't agree with that strangely enough. I think the only reason we had enough credibility to maintain the confidence of [Tanzanian President] Julius Nycrere and [Zambian President] Kenneth Kaunda, [Mozambique President] Samora Machel and [Angolan President] Agostinho Neio and ulti-mately SWAPO and maybe even South Africa is that we have been very candid and open and honest, I think even the South Africans have got to appreciate that.

l refuse to say one thing in one place and another thing some place else. We have had a disruption in the Horn, we had several disrup-tions in Shaba, we have got covert clandestine activities brewing in numbers of places. In that kind of atmosphere, unless somebody or some countries are willing to be open and candid in public about their policies, it is very hard to maintain any trust. But Namibia is still very delicate, and I'm not ready to count that a success as yet. The success we've had, bowever, has been more the work of Donald McHenry than mioe [Mr. Young's deputy]. Q. - If Namibia does work out

and both sides without serious reservation accept the Westero plan and it is approved by the Security Council, what is this going to do to the atmosphere in Rhodesia. Will it make an "all parties" conserence

A. — I would say it would be much more likely because I think both sides would begin to see that a UN presence is fair and just and that it is much better than what they have been living under. I am hoping that South Africa has had enough experience with the pragmatism that emerges when a gov-ernment takes power from their dealings with Mozambique and Angola so that they will realize that this kind of transformation in Namibia is very much in their in-

New Evidence Suggests a Genetic Link

Alcoholism: Like Father, Like Son

WASHINGTON (WP) - For most of this century, al-coholism has been attributed to environmental, cultural or psychological causes. Our Victorian forebears thought otherwise, blaming the vice on a "consotutional weakness" passed on from genera-tion to generation. But such thinking was brushed aside by sociological and psychological explanations

early in the 20th century.

Now, it appears, our Victorian ancestors may have been onto something, but perhaps not for reasons that they would have understood. New evidence suggests that, in addition to the other factors. heredity may play a role in the development of some forms of alcoholism. Something in one's genetic makeup, in short, may predispose one toward becoming an alcoholic.

A few years ago, such thinking would have been dismissed. Today, though, it has crossed the boundaries into scientific respectability. Authorities say that the new evidence - most of which has surfaced io 10 years — may represent an exciting breakthrough in the understanding of alcoholism. Some say that the genetic re-

search oot only provides the first

solid evidence that alcoholism in human beings may have a biological foundation but also presents the most convincing structure to date for any of the theories on the causes of alcoholism. And its implications for the prevention and treatment of alcoholism are enormous, they say.

If there is a genetic component to alcoholism, researchers say, and if they are able to pinpoint an underlying biological mechanism as the "trigger," they may someday be able to develop medications to con-lrol or prevent the disorder. At the very least, counseling of alcoholic parents and their children may help break the chain that researchers

one generation to the next. Mechanism Sought

suspect often is being passed from

Some alcoholism researchers, however, believe that too much emphasis is being placed on the genetic argument. They say that no explanation of the causes of alcoholfrom its use. And they note that scientists have yet to identify a specif-ic hiological mechanism that leads to the development of alcoholism. Not yet, perhaps, but many sci- weeks of life.

entists say that it is just a matter of

These studies, for the first time, have separated heredity from environment as a causal factor - and. in every case, found heredity to be the most important factor.

Older, so-called family studies

had boroe out the common knowl-

edge of the Victorians that alcoholism does, indeed, "run" in families. Such studies did so by looking at the relatives of alcoholics and finding that they had a much higher rate of alcoholism - about five times higher — than occurs in the population at large. (Figures on alcoholism rates are notoriously hard to come by, but most experts believe that the alcoholism rate among men in most Western countries runs about 3 percent to 5 per-cent of the population, and about one-tenth of I percent to I percent for women). But since most chil-dreo are raised by their biologic parents and thus receive from them both their genetic material and their family environment, family studies had done little to clear up the question about whether it was redity or environment that was

mainly at fault. Scandinavian Studies

The newer studies have gotten around this problem by focusing on persons separated in early infancy from their biologic parents — the suppliers of their genetic material
—and raised by unrelated adoptive parents - the suppliers of their environmental material. Most such studies have been done in Scandinavian countries, where oational registers are kept on alcobolism and other social problems, and the small size and low mobility of the populations make it relatively easy to track down research subjects. The studies also have focused largely on males, who researchers say are in much greater supply than female alcoholics.

One of the largest studies, carried out in Denmark between 1970 whether it was a biologic parent or and 1976 by Dr. Donald Goodwin, a stepparent. The only consistent then a professor of psychiatry at Washington University in St. Louis, Mo., found that sons of alcoholtsm should overlook the ics were about four times as likely socialization that people receive to be alcoholics as were sons of nonalcoholics. And this occurred even though the sons of alcoholics had no exposure to the alcoholic biologic parent after the first few

Intriguingly, Dr. Goodwin found

time. As evidence, they point to a group of sludies that have been done in the last few years in Denmark. Sweden and the United that sons of alcoholics were no parents. His aim was to test more likely to become "heavy" or whether such "social maladjust-ments" as alcoholism and criminal-ity have genetic determinants. were sons of nonalcoholics. To be classified as "alcoholic," subjects sons of alcohlics were about three had not only to drink excessively, times as likely to be alcoholics as but to experience severe alcohol-related living problems, such as mari-

tal troubles and frequent blackouts. found no such correlation between Dr. Goodwin, now chairman of the psychiatry department at the University of Kansas Medical Center in Missouri, also compared adopted-out sons of alcoholics with their brothers who had been raised by the biologic parents and found that the rates of alcoholism of the two groups were almost the same. despite their different upbringings.

'Fathers' Sins'

In a that book he wrote based on his studies, "Is Alcoholism Hereditary?", Dr. Goodwin concluded that his findings "tend to coutradict the oft-repeated assertion that alcoholism results from the interac-don of mulople causes — social, psychological, biological. This may be true of milder forms of alcohol-ism, but conceivably severe alcoholism could be relatively uninfluenced by environment, given free access to alcohol. The 'fathers' sins' may be visited on the sons

even in the father's absence." Dr. Goodwin's findings reinforce those of another study done in the United States in 1972. Researchers led by psychiatrist Marc Schuckit, then at Washington University School of Medicine, studied the incidence of alcoholism in persons whose biologic parents had been di-vorced and wbo, as children, were raised apart from one of those parents. Either one of their biologic parents or one of their stepparents

was alcoholic. The researchers found that the subjects were much more likely to have become alcoholic if the biologic parent was alcoholic than if the stepparent was alcoholic. Moreover, the likelihood of developing alcoholism was oot increased by living with an alcobolic parent. whether it was a biologic parent or predictor of alcoholism was having an alcoholic biologic parent.

The most recent study to lend support to the theory of a genetic component in alcoholism was reported early this year in Sweden. Dr. Michael Bohman of the University of Umea checked official registers of alcoholics and criminals in a study of more than 2,000 adop-

He found that the adopted-out were the adopted-out sons of nonalcoholics. In contrast, he the criminal records of biologic

Twins Studied

Other recent studies, most of them focusing oo twins, have supported the idea of a genetic compo-nent for alcoholism in human beings. The assumption behind such twin studies is that identical twins and fraternal twins differ only in their genetic makeup, since they grow up in a similar environ-ment. Thus, if one compares members of twin-pairs for the manifestadon of a certain condition, and finds that identical twins share the condition more than fraternal twins, one can assume it has a genetic component.
Using these assumptions, a

Swedish study compared twins for alcoholism and found that both members of identical twin sets were twice as likely as the members of fraternal-twin sets to evidence alcoholism. And a U.S. study examining rates of alcohol metabo-lism found that identical twins had the same metabolism rate for alcohol, whereas fraternal twins had a different rate. Both studies concluded, therefore, that genetics played a larger role than environ-

Strong Case

The collective weight of such studies is beginning to make a strong case for a genetic factor in alcoholism. Dr. Gian Salmoiraghi, associate director of research for the National Institute on Alcohol Abuse and Alcoholism, calls the genetic research "of fundamental importance" in providing leads on possible causes of alcoholism.

"We are stumbling in the dark," he said. "There are all sorts of theories. But there is a difference between theories and facts, and genetic studies are finally providing facts." He added that "the findings we have in genetics are the most convincing we have for any of the theories as to the etiology [cause]* of some forms of alcoholism.

U.S. Commodities

CHICAGO, July 16 (AP-DJ) - Preliminary estimates that U.S. farmers will reap a bountiful harvest this fall put B damper on grain futures last

The outlonk for larger-than-expected grain supplies was detailed in the Department of Agriculture's crop report and subsequent revision of its

supply-demand projections.

Basically, the department judged that farmers will harvest B record 1.8 hillion bushels of soybeans and B similar amount of wheat. Corn production was estimated at 6.1 billion bushels, which would be the third largest

crop on record. Grain specialists felt the government's figures on per-acre yields were particularly optimistic, considering late spring plantings and vulnerability

The item that raised the most consternation, though, was the department"s minor decrease of estimated soybean stocks at the end of the season. Good export demand and domestic consumption of soybeans this year led speculators to believe the surplus would be substantially smaller.

Government officials explained that last year's soybean crop had been underestimated, and that the revised figures included a statistical adjustment. But despite the skepticism, virtually all grain and soybean prices on the Chicago Board of Trade were marked down. The higgest losses occurred in contracts for delivery before the autumn

arvest.
Technical liquidation, prompted by sizable deliveries of the actual commodities against open July contracts, contributed to the extreme weakness in the spot months. The July soybean delivery toppled 45 cents during the period, and contracts representing the crop that will be harvested in the sutumn gave up as little as 4% cents a bushel. Wheat futures lost 10½ to 1314 cents, while corn prices were cut 41/2 to 12 cents B bushel.

Gold on New York's Comex inched up 10 to 50 cents, closing at \$186 an ounce in July contracts, while silver eked out gains of less than B cent an ounce. Copper futures, responding to price hikes by some producers and positive technical influences, rose almost 2 cents to 61.9 cents a pound in spot deliveries.

point spread over the London interbank offered rate (Libor).

Chase Manhattan's \$150-million. 15-year offer did not generate the wild enthusiasm many observers had expected for the first floater from B top U.S. bank because of the miniscule eighth of B point spread over Libor. (It was incor-rectly reported here last week that Chase was offering a coupon pegged at a quarter-point over Libor.) Priced it par, it was quoted at 98%. By contrast, Midland Bank's \$125 million, 15-year offer-

ing carrying the more classic quarter-point spread over Libor, was trading at 99.

However, bankers report considerable demand for Banque Exterieure of Algeria, which is offering a coupon of three-quarters of a point over Libor, or a minimum of 8% percent, for its \$35 million of sixyear notes, a hefty return in light of other recent "exotic" borrowers who offered only quarter-point margins. The amount of this loan is likely to be increased. This is still (Continued on Page 11, Col. 1)

The U.S. Economic Scene

Inflationary Pressures Seen Worsening

New York Stock Market

By Vartanig G. Vartan

NEW YORK, July 16 (NYT) — A sharp and surprising rally on Friday sent the stock market briskly ahead last week to disperse some of the

gloom gathering recently over Wall Street. After Thursday's close, the

Federal Reserve announced that the nation's basic money supply soared

\$4.9 billion in the latest week, which logically should have sent fears of

tighter credit shuddering through the investment community.

Instead, the market moved steadily higher in the week's final session,

buoyed partly by the receipt of a big aircraft order by Boeing. For the full

week, the Dow Jones industrial average rose 27.37 points to 839.83, while

Boeing traded at its highest price in more than a decade, climbing 7½ points in 59½. One prop to the market was the growing tide of higher

profits reported for the June quarter.

Volume on the New York Stock Exchange expanded to 128.58 million shares from the previous week's turnover of 83.78 million that reflected

A dilemma still facing the securities markets, bonds as well as stocks, is

the upward path that interest rates have been taking. One cautious appra-

isal came last week from the man at the top of the nation's interest-rate-

making mechanism. William Miller, chairman of the Federal Reserve

Board, told the House Budget Committee that interest rates would contin-

ue to rise through the end of this year. He did not predict how high they

would go, but he said that he expected the peak to be reached before the

Meanwhile, a number of large new offerings reached the fixed-income market, among them a \$300-million issue of 40-year debentures by Pacific Telephone and Telegraph. This was the first trip to the public market by

Pacific Telephone, B member of the Bell System, since the credit rating of

Pacific Telephone was lowered by Standard & Poor's. The issue was priced to yield 9.57 percent.

issues. When the prices showed big moves, the options market responded

By Thomas E. Mullaney

NEW YORK, July 16 (NYT) -NEW YORK, July 16 (NYT) —
Inflaonnary pressures and expectations throughout the U.S. economy
appear in be worsening, and the
administration's game plan for
dealing with them is simply not
working. The lack of progress in
achieving a number of objectives—
on taxes enemy jobs and prices on taxes, energy, jobs and prices — is the cause of the spreading malaise among consumers, inves-

tors, businessmen and economists. Congress, of course, has to share a large part of the blame for the eroding state of confidence in the country Many of its actions — on Social Security financing, the minimum wage, farm-price supports, regulatory burdens and other prorams - have exacerbated the inflationary thrust. Those actions, together with Congress's procrastina-tion on some of the tax and energy legislation, have not only inhibite business investment, but also beightened tensions here and

"It's so darn hard to get anything done down bere," said B top gov-ernment official in Washington B few days ago in a mood of frostra-

After more than a year of haggling in Congress, there is still no comprehensive national energy strategy in place. Neither is there any clear indication of the type of any clear indication of the type of tax-reduction program, if any, that may pass after six months of proposals, changes and counter-proposals. Moreover, there have been only tentative and limited agreements in the lengthy multination tariff negotiations at Geneva, and by the end of last week, the United States had yet to unveil its

promised national-export policy. In the domestic business sphere the economy is beginning to slow down, interest rates are still rising, and threatening to reach the douhle-digit area in some cases; the dollar continues to slip and the nation's huge trade deficit remains

Worst of all, the administration

the Fourth of July holiday.

to generate confidence in its plan.

While it has belatedly come to recognize the danger of the infla-tion problem, the administration still seems reluctant to embrace the remedies so many outside government have said are imperative - B drastic effort to reduce the swollen federal deficit and B firm commitment to support tax measures designed to promote greater business investment. Indeed, it has given scant stiention to the role of increased productivity as an antidote to inflation.

The administration's policymakers seem to betray B sense of uncer-tainty and helplessness. It is not an auspicious background for President Carter who began summit talks this weekend in Bonn with major world leaders, some of whom have been highly critical of U.S. economic trends.

West German and Japanese officials, concerned about the rise in value of their currencies in the foreign-exchange markets, have point-edly assailed the United States for what they believe has been B failure to deliver on its energy, trade and inflation promises.

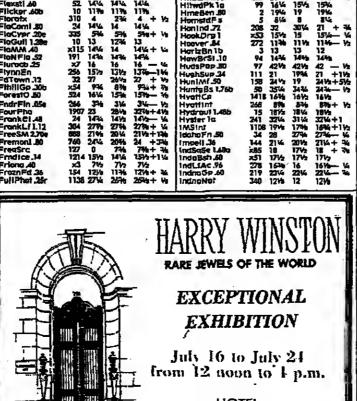

Mr. Carter, however, indicated he was not going to be defensive in his private discussions with the other six leaders at the summit, Before leaving Washington last week, he indicated that he intended to stress this country's sharp cuthack in oil imports during the first half of the year, its continued economic expansion and the significant reduction in unemployment over the last few years as job-creation fig-ures swelled impressively. And he maintained that there has been no fundamental deterioration in the U.S. economic circumstances.

The art of institutional money management demands experience, sound judgment

When trying to select the right investment at The Bank's own fixed interest securities prothe right time institutional investors are often confronted with a myriad of complex factors requiring careful analysis and evaluation. Westdeutsche Landesbank can be of invaluable help in this decisive process. It offers highly experienced advice on fixed interest securities and shares against a background of financial responsibility you expect from a German state-backed wholesale financing institution.

Government bankers, portfolio managers, trust administrators and other institutional investors have come to appreciate WestLB's expert financial counsel.

vide a secure, attractive investment in one of the world's strongest currencies. Sophisticated investors value WestLB's offer of a wide selection of "Schuldscheindarlehen" (SD Certificates), a safe investment since these Certificates in DM are generally guaranteed by a state agency or an institution from the public sector. They yield an attractive return usually somewhat higher than bonds. and for immediate liquidity needs they can easily be resold through a well functioning.

As a primary and secondary market leader backed by total assets of more than DM 80 billion, WestLB is a first address for placing of and trading in fixed interest securities. Also, its certificates of deposit are highly valued from London to New York, from Luxembourg to Hong Kong.

When next reviewing your investment strategy. consult WestLB first. You'll get sound, comprehensive advice in the private banking tradition backed by the resources of Germany's foremost wholesale financing institution.

established market.

Euromarket

(Continued From Page 9)

cheaper than the cost of a syndicated bank loan as shown by Banque Nationale d'Algeric's \$120-million. seven-year loan which pays 14 points over Libor for the first three years and 14 for the remainder.

Aiming to appeal to institutional of inflation in West Germany. investors (with a big pre-placement in the Mideast). American Express International Bank is issuing \$35 million of floating-rate certificates of deposit denominated in units of \$50,000. Interest on these five-year notes will be set at a quarter-point over the mid price of the bid-asked oix-month Eurodollar rate (equal to about an eighth of a point over Libor). Issuing CDs instead of FRNs will mean a considerable saving to the bank as the selling concession and management fees are both only a quarter point com-pared to the total 2 percent com-mission paid on FRNs.

An attempt to re-open the fixed-rate sector for dollar bonds drew Bank Loans much interest from professionals. but they were very cautious about the outcome due to the very tight conditions being offered on J.C. Penney's \$100-million loan. The five-year paper is expected with a coupon of 8½ percent and an issue price of par. Far more generous yields can be found in the secondary market managers admit, but not for quality (Penney is rated double-A by Standard & Poor's and single-A by Moody's) U.S.

While most of the market remains paralyzed by fears of a U.S. credit crunch pushing interest rates to much higher levels, there is a minority view that the peak is near at hand and that the terms Penney is offering "anticipate" an expected decline in rates later this year.

The poor performance of the Boots convertible in the secondary market, priced at par with an annual coupon of 6% percent it tumbled to 97% bid-97% asked, has soured the market on Thorn's \$25 million convertible. Managers stress that Thorn's 10-year loan is five years shorter than Boots' while the coupon is slightly more generous at a semi-annual rather than annual basis. In addition, Thorn's conversion premium will be below 5 percent compared to the 6.9 percent ser by Boots.

The DM market is also not doing well. Bankers report that aggressive support by the Bundesbank was needed last week to stabilize the domestic market. Its purchases of government securities was estimated in excess of 800 million DM, its heaviest buying in some three years, as investors began reassessing the outlook for the mark,

Bankers are now estimating that only half of the public sector's borrowing needs for the current fiscal year have been covered to date, on the Parana River. The loan has leaving much financing to be done. In addition, tax cuts or additional spending commitments expected to and the other for 12 years at 2 be made at this weekend's summit points over.

meeting in Bonn will increase the as much as a point last week. Curgovernment's need for cash. On top rently on offer is a 100-million DM. of this, there is considerable uncer- 12-year issue for Norges Kommutninty about the implications of the nalbank carrying a coupon of 6 Bremen commitment to creating a percent. While dealers welcome the new currency zone in Europe. The uptick in the interest rate — previfear in Frankfurt is that, if imple- ous issues carried coupons of 5% mented, it will mean a higher rate percent - placing this paper is ex-

All of this spells higher interest rates, and as a result, investors are getting out of the bond market. The yield on 10-year public issues is now up to 6.7 percent compared with 6.4 percent a week ago and 6.15 percent a month ago.

This upswing has thrown a blanket of caution over the market for DM Eurobonds, where prices in the secondary market were off by

Libya Backs

(Continued From Page 9) offered rates (Libor) for the first two years and % for the final three years.

Terms on the second toan, reportedly for \$250 million, are still under discussion. This loan would be used by the central bank to cov-er some of the outstanding debt owed to foreign suppliers of goods to Turkey.

Nigeria's \$1 billion, eight-year loan has led some bankers to comment that rates on syndicated loans might finally have ended their long decline and be heading upward However, the bulk of the market believes that terms on its loan have hardened slightly from its previous \$1 billion operation because of its deteriorating financial position rather than any shift in the overall market. It is currently offering I point over Libor for the first four years and I's for the final four compared to I point for seven years in its earlier operation.

Other loans in syndication include:

• \$500 million for the province of Quebec. Terms are % over Libor Sonatrach sold 2 million Bahreni for the first two years and % for dinars (about \$20 million) of 10the remaining eight years.

for five years. Comission Federal de Electricidad, which started out seeking \$400 million, has been able to increase its loan to \$600 million and may end up with \$700 million by the time syndication is closed The seven-year facility will pay point over Libor.

 \$200 million for Brazil's high way agency, which is arranging 12-year loan at 1% points over

• \$175 million for Itaipu Bina two parts, one for 10 years with an interest rate 1% points over Libor

pected to be difficult, especially as the managers have committed themselves to an issue price of "not

is arranging a private placement of 75 million DM, reportedly a 12year loan carrying a coupon of 6 percent and an issue price of 99%. Total commissions of 1% percent reportedly have upset banks invited into the loan. Commissions on public issues are 2½ percent while the 70-million-DM private placement for the Coal and Steel Community.

The downdrift has also affected percent, ended at 101-102, off a

Tokyu Car is currently offering 30 million DM of eight-year convertibles carrying a coupon of 3½ percent and All Nippon Airways will be offering 100 million DM of 10-year convertibles this week, also carrying a coupon of 31/2 percent.

co's Comission Federal de Electricidad offered 75 million guilders of five-year notes carrying a coupon of 7% percent and an issue price of 99. A Norwegian borrower is next expected to tap this market, offering 40 million guilders of 10-year notes with a coupon of 814 percent.

• \$500 million for Mexico's percent. Investors have the option Banco Rural, at I point over Libor of cashing in their bonds at the end of the fifth year.

THE FRENCH AGAINST THE FRENCH

By Milton Dank. Cassell. 365 pp. £6.45

Reviewed by Parke Fulham

all, dispassionately pursued an in-

quiry into the still murky circumstances of his arrest by the Gestal po. But this book does not ignore

the other sectors of the Resistance

the older sectors of the resistance, the soldiers led by Combat's Capt. Henri Frenay, the Communists who all but collaborated with the

Germans until Hitler invaded the

Soviel Union in June, 1941, the lib-

eration group led by Emmanuel d'Astier de la Vigerie, and many

others. The quarrels among Resistance leaders, their unwillingness to

submil to overall direction from De-Gaulle's headquarters to London

their too-often fatal failures to obey

the basic rules of clandestine opera-tion — all form a sad pattern.

While the Resistance was strug-gling with its internal problems on

the one hand and carrying on an increasiogly effective fight against the occupiers on the other, the sufferings of the French people mounted. Short of food and transport their worth subject to determine the control of the control o

port, their youth subject to draft for labor in German factories, de-

pressed by the sight of profiteers gorging by night at expensive black-market restaurants and turn.

ing obscene profits by day, for most Frenchmeo the idea of liber

atioo and peace seemed very far away. Perhaps saddest of all was the eager collaboration by rightists.

French Fascists found, in France's defeat, the opportunity to build their sort of France: authoritarian

THIS FINE compelling book on pieced together a careful picture of the man and his work and above pation ends with this stark sentence: "By 1964, twenly years after the Liberation, not one collabora-tor remained in jail." But forgiveness is one thiog, forgetting is another. Even today, 34 years since the German armies were driven from Paris, the questions remain. Books and films, by Frenchmen and foreigners, continue to assess the intertwined problems of collaboration and resistance - more often than not with equivocal results. Milton Dank, in this book, has set himself the problem of sorting out what happened to France and the French between the collapse in June, 1940, and the Liberation four years later. It is not an appealing story.

Nor, by any means, is it a chronicle in black and white, dealing sim-plistically with heroes and villains, the good and the bad. Perhaps the greatest difficulty for outside observers is to avoid easy categoriz-ing. For as the early '40s rolled by, blacks and whites often faded into grays, courage melded into cowar-dice, heroism became betrayal. Consider the case of Marshal Phillippe Petain himself, a hero of World War I vilified one war later for accepting the leadership of a de-feated France. Or that of Jean Moulin, the prefect of Chartres who became Charles de Gaulle's emissary to the first recistants emissary to the first resistants -and was later betrayed by French men and tortured to death by the Gestapo. Or that of Joseph Dar-nand, another French hero of World War I, who ended his career — and his life — as commander of the despised Milice, a willing crea-

ture of the Germans. One of the several virtues of this book is that it sets out, for the general reader, the background to the fall. France during the '30s was deeply divided politically, economi-cally feeble, without national leadership or purpose. The shock of a war that few really believed was coming, the shattering actuality of defeat, the assumption of legitima-cy by Petain — all this conspired against the quick creation of a spirit of resistance. General de Gaulle's call to arms from London, on June 18, 1940, was heard by few. Politicians, generals, artists and iotellectuals almost blindly rallied behind Petain.

chute in January, 1942, the small, scattered groups of resistants began to coalesce. Moulio's story itself is a key part of the book. Dank has

Solution to Friday's Puzzle

anti-Semitic and, in fact, a copy of the regime across the Rhine. Some joined the pathetic Vichy regime some flocked to France's version of the Gestapo, some even joined the SS and fought in German uniform against the Russians. Before the war, some of these men had played leading roles io national life: Pierre Laval, premier of France; Jacques Doriot, a former Communist who turned to Fascism and served in the Chamber of Deputies in the '30s; Marcel Deat, a well-known journalist turned politician — the list is depressingly long. But through the pattern of French life, the thread of collaboration ran at almost every level. Economic class or social status turned out to be no guide to individual choice. Dank's book brings coherence to confusion. Unlike most other works on the Occupation, it sets out not to tell the slory of one man, or one group, but rather to offer a

With Moulin's arrival by paradispassionate overall view of the period, Dank offers facts — as best as they can be determined - gor judgments. It is left to the reader to

choose, weigh, decide. Today, decades after the end of the war, the rightness or wrongness of the choices seems clear. In some cases at least, distance enhances. But implicit in this book is a lingering, unanswerable question: How would one's friends and one's neighbors of today behave under the pressures of the Occupation? And perhaps most difficult of all: What would you have done?

Parke Fulham is an American resident of Paris who has read widely in the literature of the Resistance and the Occupation.

CHESS

The ideal defense for a castled kiog is three pawns io a row oo the second rank in front of him. If one of these pawns is moved, it makes it all the easier for the opposent to advance one of his own to engage it and force an exchange that opens a file for attack by rooks and queen.

A corollary to this is that if a pawn has already been moved oo the wing which you plan to castle, doo't. Or, if you still insist oo cas-tling there, it is vital first to counterattack against the opposent's king or against his center so that his forces will be preoccupied with defense.

In International Master Kim Commoo's game with Grandmaster Lubomir Kavalek in the 13th round of the United States Championship Tournament in Pasedena, Calif. Commons riskily ignored these principles and suffered the consequences.

The object of the controversial 8...P-R3 is to uopin the black KN at a moment when 9 B-R4, NxP: 10 Q-B4, N-N4; 11 NxN, PxN; 12 Q-R4, Q-N3; 13 P-B4, N-R2; 14 P-B5, R-QN1 produces a probably not quite sound gambit for White.

The system of development that Kavalek followed at moves 9-13 has been used with success in several games by the Dutch grandmaster Jon Timman.

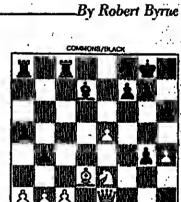

Since it is apparent that 13 P-KR3 prepares 14 P-KN4 to storm a kingside weakened by 8...P-R3. Commons should have counteratlacked to the center with 13...NxN; 14 BxN, B-B3; 15 Q-K3. P-N5; 16 N-K2, P-K4. Instead, he presented a target too early with 13...O-O, so that when he got around to 17...P-K4. Kavalek had 18 P-N5! at his

K4. Kavalek had 18 P-N5! at his disposal.

Commons might have tried 18...PxB; 19 PxN. BxBP. except that 20 N-N3. Q-R4 (to stop 21 N-R5); 21 P-K5!. PxP; 22 N-R5, K-B1; 23 NxB. PxN; 24 PxP, Pxp; 25 QxRPch, K-K2: 26 Q-N5ch, K-Q3: 27 B-K4, QR-N1: 28 RxPch would have foiled the plan fro the king to reach safety on the queenside. reach safety on the queenside.

After I8...PxNP: 19 PxKP. Com-

mons could not recapture with 19...PxP because 20 QxKNP, N-K1; 21 QxB, PxB: 22 NxP would have lost a pawn to White. In any case, he did manage to keep the

Position After 27...P-R4

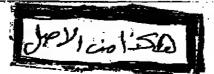

file closed with 19...N-R2; 20 PxP. QxP; 21 P-KR4, P-N5. Commons slackened some of the pressure leveled against him by exchanging with 25...B-QB4; 26 N-Q5, BxB;27 NxB, but it wa still dif-QS, 8KB.27 NxB, but it wa still difficult to see how he should have continued his defense. He was bound to lose his foremost. KNP and he surely could not afford to open the KR file with 27...QxP. Perhaps be might have attempted counterattacking against the KP with 27...R-B4.

with 27...R-B4.
Instead, his inconsequential
27...P-R4? permitted Kavalek to
play 28 B-B5!, far stronger than 28.
NxP. BxN: 29 QxB, since the
knight was White's more effective attacking piece here. Had Commons captured with

28... BxB. he would not have survived the attack after 29 NxB, Q-K3; 30 QxP, P-N3; 31 P-R5, But after 28...B-K3; 29 NxP, he had oo place to put his queen.

On 29...Q-B5; 30 N-B6ch, he had to resign because of 30...K-R1; 31 Q-R5ch, Q-R3; 32 QxQch, PxQ; 33

Owen's Rally Falls Short

Nicklaus Is Victor In the British Open

By Neil Amdur

ST. ANDREWS, Scotland, July lo (NYT) — It was a "borse race," just as Tom Watson had figured. Except that the two golfers who wound up going head-to-head for the 107th British Open champion-ship yesterday were Jack Nicklaus Simon Owen. Yes, Simon

Proving that be could respond to a pressure situation, Nicklaus won nis third title and second over the Old Course of the Royal and Ancient Golf Club with a final round of 69 and a 72-hole total of 281. seven under par. Nicklaus's margin of victory was two strokes.

Better Than Ever

suggestions that golf's leading career money winner, without a maor title to his credit over the last

Nicklaus said afterward. "I feel like I'm a better player

now than I've ever been," he added. The weeklong preparations that Nicklaus made for this championship, adjusting to variations in wind, pin placements and the countless hidden bunkers, were crucial during yesterday's stretch

The surprisingly strong performance by the 27-year-old Owen, an unknown New Zealander who had barely survived prequalifying. heightened the drama and seemed to ignite the competitive fires in Nieklaus.

Owen finished with a final-round His 17th major tournament 71 and 283, bunched with Ray championship should silence Floyd. Tom Kite and Ben Cren-

Ten golfers started the final 18 or title to his credit over the last holes only two strokes apart. But three years, had been losing his the focus shifted to Nicklaus and golden touch. It was the best he Owen, who were playing as the

The Long Wait Is Over For Golf's Golden Bear

By Barry Lorge

ST. ANOREWS, Scotland, July 16 (WP) — The loog wait is over for Jack Nicklaus. The doubts voiced by so many people that they bad become his self-doubts have been put to rest.

"The Golden Bear," at 38, can still win major golf tournaments.

Nieklaus's two-stroke victory in the British Open gave him the 17th
"major" of his career, the first since the 1975 PGA Championship. He has won five Masters, four PGAs, three U.S. Opens, three British Opens and

In 17 years as a professional, Nicklaus has competed in 67 major championships, winning 15, finishing second in 14 and third in nine. He has protournaments in the United been in the top 10 an astonishing 52 times. No one in the history of golf States, is a long hitter. Seemingly ever compiled such a record, but Nicklaus hadn't won any majors lately, energized by his string of birdies, and the page in the complete string of birdies, and the page in the complete string of birdies. so the nagging claim that he no longer had the stomach for pressure

"It was a little tiring, bearing, "Why haven't you won a major title in three years?" all the time. At least I won't have to answer that question for awhile." Nicklaus said after his second triumph on the Old Course at St. Andrews. He won here in 1970, beating Doug Sanders in an 18-bole playoff after winning his first British Open at Muirfield in 1966.

"After playing as well as I have the last couple of years and finishing second in so many tournaments, I started to wonder, 'Am I ever going to win again?" Nicklaus admitted.

"Am I slipping or is it a figment of my imaginatioo? Sure, that thought

"I know I'm not as strong as I used to be. I can't overpower a golf course like I used to. But I still hit plenty long enough, and I feel I'm a better golfer now than I ever have been. I control my nerves and a lot of

nther things better than when I was younger."

Nicklaus collected 12,500 pounds, about \$24,000, for yesterday's victory. He has won \$193,626 on the U.S. tour this year, bringing his career total to \$3,290,342.

had played from tee to green in a big tournament, the 38-year-old next-to-last twosome, when Nick-laus took a one-stroke lead on the field with a 5-foot birdie putt at the

However, Owen seemed to draw inspiration from the large gallery and perhaps from watching Nick-laus analyze a course, affectionate-ly dubbed "The Old Lady," that he had courted and conquered eight years ago. In amazing fashion, using a driver off almost every tee and putting aggressively, Owen strung together birdie putts of 18 feet on the 9th hole, 10 feet on the 10th, and 3 feet on the 12th.

When he chipped in from 50 feet on the 15th, to roaring applause, Owen suddenly found himself one stroke ahead of Nieklaus. Who was Simon Owen anyway? Spectators were wondering as they carted their periscopes and sweaters and rushed for better viewing positions at the r better viewing positions at the 16th bole.

Other Questions

Nicklaus, who had never even met Owen until they shook hands at the first tee, was asking himself other questions, like last year at Turnberry when Watson rolled in a loog birdie put at the 15th and went oo to a one-stroke victory. Here we go again, Nicklaus thought.

"I didn't think he knew the course as well as I did," continued Nicklaus, who had two-putted the 10th, 13th and 15th and shook his head in frustration when a 25-foot birdie putt lipped the 11th hole. "My mind flashed back to last year, and I said, 'He's going to have to earn it.

he outdrove Nicklaus by 30 yards at the 16th but played his second shot, an iron, too aggressively, overhit the green and took a bogey. Nicklaus used a 3-wood off the tee, a 9-iron to within six feet of the flag and then sank a birdie putt that put him back in front for good.

Frustration Abounds

"He didn't back off the Old Course," Nicklaus said, in tribute to Owen, who also lost another stroke to Nicklaus with a bogey at the 17th bole. "He charged it all the way. There's nothing wrong with that, but you've got to get burned sooner or later.

Ashes of frustration were strewn

British Open winner Jack Nicklaus (waving) walks from the 18th green with runner-up Simon Owen of New Zealand.

about the Old Course like heather. first 10 boles and then rallying with mostly by Watson. Neither Kite nor Floyd was satisfied with his final round. Kite shot 70 hut could not muster a birdie over the last seven holes. Birdie purts flowed from Floyd on the back nine — oo the 10th, 11th, 14th, 15th and a 12-footer at 18 that brought him bome with a 31. yet totally frustrated. Where were the putts in the first three rounds, be wondered? "I can't find an ad-jective to really describe the way I have putted." Floyd said, despite a 68 for the day.

Nicklans was prouder of the way be played yesterday than of the \$24,000 first prize. Although be won the Inverrary Classic and Tournament Players Championship with lower scores earlier this year, yesterday's victory was achieved with a combination of solid drives and superb irons.

"I won this touroament without a putter for most of the tourna-ment," he said, alluding to his sec-ond round of 72 when he two-putted every green.

Tour Leader Ousted After Doping Check

ALPE D'HUEZ, France, July 16 (1HT) - The new overall leader of the Tour de France bicyele en-durance race was disqualified tonight for fraud in a doping control. The action was believed to be unprecedented for the Tour de France.

Hours after he won the 150-mile stage by a comfortable 38 seconds and moved into the lead, Michel Pollentier was ruled out of the Tnur. He was also fined 1,000 Swiss francs and placed last in today's stage. without the possibility of appeal.

According to trustworthy sources, Pollentier was detected affering a urine specimen other than his own in the mandatory doping test for the winner of each

stage of the 23-day race.

The racer was said to have returned to his hntel before the test and to have donned a long-sleeved jersey, the better to conceal a small flask containing another person's urine specimen. This flask, it was said, was concealed in Pollentier's right armpit, with a rubber tube leading from the flask down his arm to his

This method of attempting to evade doping controls is common and so Pollentier aroused the suspicions of the attending physician, a Or. Calvez in the French cycling federation, and an inspector, Renato Sacconi, of the International Cycling Union.

Again according to the sources, they suddenly grabbed Pollentier's arm and pulled up his jersey, reveal-

ing the tube.

The best official report about the incident was a

brief communique stating the disqualification and noting that the apparatus used by Pollentier had been Tour de France officials, reported to be stunned by the news, were not available for comment. But veteran

observers of the race, the most prestigious in cycling, could recall no precedent for a leader's being disqualified on any charge and no precedent for any racer's being disqualified for fraud. Pollentier, a 27-year-old racer for the Flandria team, was also unavailable for comment.

When Pollentier won today's stage, the first in the Alps, he was a big winner, putting nn the overall lead-er's yellow jersey for the first time in 16 days of com-

An awkward but strong climber and sprinter, Pollentier was fourth overall before today. He would have been stroogly favored to win his first Tour de France. Second, four seconds back, was Joop Zoeternelk and third, another 14 seconds back, was Bernard Hinault. They both moved up one place, Zoeternelk into the leader's position and Hinault into second.

Seeks First Victory

Zoetemelk, 31, is still seeking his first victory in the Tour in his eighth attempt. He has finished second three times, but is generally considered to be either too unimaginative or too cerebral, depending on the critic, to believe in himself.

Riding for Mercier, Zoetemelk was second before today, but one minute three seconds off the pace. He finished fourth today, 1:19 behind Pollentier, but made up time when the previous leader. Joseph Bruyere, collapsed and finished nearly 12 minutes

As for Hinault, 23, he has made a formidable debut and promises to improve before the finale next Sun-

day on the Champs-Elysees.
"I want to arrive in Paris with a good conscience,"
Hinault said between deep breaths after his thirdplace finish today. Asked if he planned to attack in

Michel Pollentier crosses the finish line.

the remaining mountains or in the race against the clock on Friday, Hinault answered simply, "Every-

He was a big gainer this weekend, although he picked up no time yesterday when he won a sprinting finish into St. Etienne, with Bruyere docked in the

So, when the 93 remaining racers set out this morning, Hinault was 1:50 behind Bruyere, the leader for the last eight days.

Also effectively eliminated is Hennie Kuiper, who finished second to Pollentier.

Wheo the top of the mountain appeared. Pollentier couldn't have been more pleased. He broke away from the pack just short of another first-class peak, the Luitel, and continued alone until the finish.

By the time he reached the base of Alpe d'Huez, 10 miles up 22 switchbacks. Pollentier was leading by more than a minute and a half. Steadily he pushed himself through a huge throng lining every foot of the

There were two accidents - involving James Hunt of Britain and Irishman Derek Daly, But both stepped from the wreckage unhurt. Emerson Fittpaldi worked his way to seventh place before retiring

Hungary Upsets Italy In Davis Cup Action

BUDAPEST, July 16 (AP) -Hungary, in an upset, today ousted favored Italy from the 1978 Davis Cup in European B Zone semifinal

In a drama-packed session lasting 135 minutes, Hungarian veter-an Peter Szoeke, producing his best play in date, beat Italian star Adriano Panatta in four sets, 6-3, 3-6, 6-0, 8-6, giving Hungary an imbeatable 3-1 edge before Balazs Taroczy, seeded 27th in world rankings, defeated Corrado Barazzutti, seed-

ed eighth, in three straight sets 6-3, 6-4, 6-4. The Hungarians set the stage for the victory nn Saturday, when Taroczy and Szoeke teamed up to subdue the favored Panatta and Panlo Bertolucci in straight sets, 6-

lialy was the 1976 Davis Cup champion and was a finalist last year but lost to Australia.

Borg Paces Sweden

BASTAD, Sweden, July 16 (UPI) — Wimbledon champion Bjorn Borg woo the crucial singles match today in the Swedish-Span-isb Oavis Cup European Zone B semifinal against Jose Higueras 6-1, 6-4. 6-2.

Huogary in the Zooe B final here in September.

Sweden, a 3-2 victor, will meet

Borg tired after playing — and winning — the Italian and French championships and his third Wimbledon tournament, was unshaken by Spain's No. 2 Higueras.
"Bjorn is in very good form, his mood is fine," said Spain's leading player, Manuel Orantes, who had evened the contest at 2-2 with a victory over Kjell Johansson earlier in the day, 6-4, 6-4, 7-5.

Britain Victorious

PARIS, July 16 (UPI) — Britain today struggled to a 3-2 victory over France in their European Zone A Oavis Cup semifinal after three fiercely fought days of tennis. Buster Mottram elinched the victory by defeating Erie Deplicker. But in the other singles match on the final day, Yanniek Noah, the 18-year-old French whiz, convincingly beat John Lloyd 6-3, 6-2, 7-5. Now Britain meets Czechoslovakis in the Zone A final at Eastbouroe, England, Aug. 15-17.

Fidrych to Work Out 2 Weeks in Minors

DETROIT, July 16 (AP) - The Detroit Tigers will send pitcher Mark Fidrycb to their minor league farm team in Lakeland. Fla., for a two-week stint to strengthen his arm, the club announced.

The 23-year-old hurler has been unable to pitch since April because of pain in his right arm.

7 Little Words

NEW YORK — The Supreme attitudes. This is as true of our attitudes toward buman biology as it is of our social attitudes. ancient Anglo-Saxon words unfit for general broadcast on radio and television. What was found offensive about them was not the subject matter with which the words deal - all concern human biology -but the application of Anglo-Saxon

vocabulary to such subjects. If I read the court correctly, it believes that most families tuned to radio or television would be shocked and offended to hear human biol-

ogy discussed in Anglo-Saxon

terms and that the law has a responsibility to pro-tect the privacy of the home from the intrusion of words widely coo-

sidered "dirty."

My sympathies bere lie with the court, for reasons that strike me as highly illogical. Words that sound perfectly at home in military barracks or a piece of literature tend to embarrass me when uttered in dio-ner conversation. When seated around the tube with Grandmother and the children, I prefer not to hear these words issuing into the family circle without the most rigo-rous justification for their use.

The Supreme Court dealt with only seven such words, but most of us could probably expand the list. Most of us know them all eveo if we doo't speak them. The question is what makes them "dirty?"

The argument of "free speech" advocates is ingenuous on this point. They argue that words, in and of themselves, are neither "elean" nor "dirty," but that only repression makes them so. The argument ignores the fact that words have power to influence how we think. This is wby racial and ethnic minorities and women light to suppress certain words referring to mioorives and women and encourage

the use of less graphic substitutes. They instinctively realize that words shape thought and affect

The Saxons were treated as barbarians. To this day most people labor under the notion that they were little better than savages, though in fact Saxon civilization was in most ways considerably more advanced than the French. In any case, the Normans won not only the war, but the minds of posterity.

Their policy was to impose their language, with its Latin roots, as the language of civilization, and to stigmatize the Saxoo toogue as the language of barbarism. Today when English speakers try to sound civilized, they shun the Anglo-Sax-on word as nasty and barbaric.

When we recoil from Anglo-Saxon terms for commoo biological functions we are probably responding reflexively to 900 years of conditiooing to the political thesis that Anglo-Saxon was the tongue of savages and Lado-root speech the voice of civilized bumanity.

Thus the Supreme Court's ruling simply recognizes a social reality bred toto the marrow of English speakers. When we flinch in polite company upon bearing someone use the Anglo-Saxoo for a humdrum bodily organ, we are really doing little more than recapitulating the responses of 11th-century Norman barons who felt themselves beset by a gross and offen-

sive people.

It was the Normans, of course who behaved with savagery. They immediately proceeded to destroy the relatively advanced system of participatory government created by Saxoo England and to replace it with the monarchical tyranny that afflieted England for ceoturies afterwards. Official robbery and slaughter became commooplace.

As for the Saxon King Harold, whose army was defeated at Haştings, the conquerors killed him in battle, theo mutilated his corpse in civilized language,

The sheikhs of the cab business are those on the 100-mile desert route between

the Red Sea port of Jidda and Taif, the mile-high

summer capital of Saudi Arabia. A Crooked Road in Saudi Arabia Desert

AIF, Saudi Arabia (AP-DJ) - The Bedouin cab driver is a breed apart, even among members of that singular calling. With his talent for camel-trading, he no longer plunders the stranger's tent but, instead, the pockets of unwary tourists, particularly if they hap-

pen to be American.

At first he is an impressive character as he sits behind the wheel with his keffiyeh, or beaddress, held in place with a cord of wool called an agal and enveloped by his ankie-length, shirt-like tobe. But on closer contact his curning emerges, and it would seem that the oil wealth of the Middle East is falling into his nut-brown fingers.

The sheikhs of the cab business are those on the 100-mile desert route between the Red Sea port of Jidda and Taif, the mile-high summer capital of Saudi Arabia. These drivers don't have meters in their cabs, so their rates tend to bob upwards like a belium-filled ballooo, particularly if the customer looks as if be can afford the

stratosphere.

All of this was brought home on a recent visit to Taif, a city of dusty streets with arabesque arches and villas with carved shutters that remaio closed in the 100-degree midday heat. I planned to go straight from Taif to Jidda airport, where I was to catch a plane for Beirut. As I checked out of the Al-Azezia hotel I asked the clerk, a bespectacled Pakistani, bow much the taxi far would be.

Unhelpful Reply

"Plenty," was the clerk's unhelpful reply.
"But could you give me a rough idea?"
"For you, or for me?"

"For you it might be a hundred rivals (about \$30). For me it would be less, because I wouldn't take a taxi. I would bargain with a truck driver to ride on back with his load."

The idea of riding on a rainbow-colored Saudi truck, likely to be jammed to overflowing with sbeep, down the mountain road from Tail with its hairpin turns, hardly appealed to me. Besides, \$30 for a 100-mile trip hardly seemed unreasonable.

I walked out to the square in front of the botel and flagged down a yellow taxi. The mustachioed driver brushed his red keffiyeh back on his head and leaned out of the window, "Jidda, How much?" I asked, rubbing my index finger and thumb together in the universal gesture. The driver held up five fingers and pulled out a 100-riyal note with the other. He wanted about \$150.

"Five bundred?" I asked in disbelief.
The driver nodded, as if this were his rock-bottom concession. So I tried again farther up the street. This driver wanted 600 rivals.

Three other taxis pulled up and joined in the bargaining. "Five bundred is a good rate," said one driver, who spoke English. "It should be a bundred," I said. "I'll take you for four hundred," said the English-speaking driver, and sensing my hesitation (I really did bave

CLASSIFIED

to make that plane) he opened his cab door and said invitingly. "We go now. Shoot. Shoot. Quick."

"Three hundred," I said, not very convincingly Four hundred," the driver insisted.

I was about to climb in when a portly barber emerged from bis shop. He had a long pair of scissors in one hand and a towel draped over a shoulder. "How much he charge you?" he asked.
"Four hundred for taking me to Jiddah," I said.

"Four hundred?" The barber raised his eyebrows, as if seeking Allah's assistance. Then, turning on the drivers, he shouted in Arabic. My driver backed away, fled to his cab and drove off.

Then the barber turned to me: "Come into my shop."

"But I don't want a haircut."

"No haircut. I find you a taxi."

Hid in Shop

So while I hid in his sbop, the barber walked around the square dickeriog with taxi drivers. Finally, be beckoned me into the street. "A bundred and twenty for the trip. Is that all right?" he asked. "Well, yes," I said, a little uncertainly because I was wondering how the driver would take it when he realized that he had settled on

120 riyals for an American instead of a Saudi barber. He did indeed look disappointed when I clambered into the cab, rather like a man who has stopped to pick up a silver dollar only to discover a milk-

bottle top.

But he nodded, not very agreeably, when I beld up 120 riyals. I shook hands with the barber and off we went. At the edge of town we were confronted with a mass of debris, sand and construction machinery and a guard watching over it. "Road closed," muttered the cab driver, slumping back in his seat.

The watchman knew less English than I did Arabic, but through a combination of exotic motions that included pointing at his watch, I gatbered that the road was closed until the afternoon. The only other road out of town went north to Medina. To reach Jidda from this road meant branching off through Mecca, the holy city, which is off limits to non-Muslins.

I climbed back into the taxi and without a word, the driver swung around and in a few minutes we were back at the Al-Azezia hotel.

The Pakistani clerk spoke to the driver and confirmed that the road was indeed closed until the afternoon. But there was one thing: "The driver says you owe him 30 rivals (about \$10). He cannot wait until afternoon to take you to Jiddah. He wants his 30 riyals now."

HOTELS RESTAURANTS NIGHT CLUBS

WINACO

"Thirty rivals for what?"
"For taking you to the edge of town."
Ten dollars for a mile ride to the edge of town and back: It was a clear case of robbery. But, resignedly, I paid the fare, dumped by bags on the steps in front of the hotel and wondered how I was going to get out of town. "How come the taxi driver didn't know the road was closed?" I asked the clerk.

"He know. All taxi drivers know. They always come back. And foreigners, they always pay for the ride going nowhere."

ADVERTISEMENTS

Pee Wee King PEOPLE: Pee wee Ring Suffers a Stroke

Country musician Pee Wee King, 64, has suffered a mild stroke and, after a brief hospitalization, is recuperating in his home in Louisville. Ky. King, who wrote "Tennessee Waltz" with Red Stewart and first recorded it in 1948, "has been advised to take things easy for at least six weeks," said a family spokesman.

Delegates to the convention of the Lutheran Church in America in Chicago elected the Rev. Dr. James Crumley, Jr. to head the organiza-tion. Rev. Crumley, 53. of East Windsor, NJ., is the secretary of the organization, the largest Lu-theran body in the United States.

* * * More than 250,000 Bob Dylan fans crowded Blackbushe Airfield near Yately, England, for the singer's European finale, causing hourslong traffic jams and and as much trouble with forged tickets. Police said a "diabolical" traffic situation had cars backed up 6 miles trying to get near the concert site, about 50 miles southwest of London.

* * * When Peter Saraceno and Linda Fraschalla walk down the aisle in Chicago, it will be a celebration of life for him. For his bride, it will be a tribute to the power of love. Two years ago, Saraceno sustained a critical head injury in an auto accident. He was pronounced dead. But a doctor, in a last check, found a faint pulse. Saraceno was connected to a life-support system.
"After he had been in a coma for 12 days," Saraceno's widowed mother. Louise, said, "the doctors told me: 'Pull the plug! Pull the plug!' "Saraceno was in a coma for 3 !a months. "Three, four times they told us he had just a few hours Mrs. Saraceno said, "But I didn't believe it. And neitber did Linda. Miss Frascballa spent every night at ber fiance's bedside, talking to him as if he beard. Saraceno did not flicker an eyelash. Friends and doctors tried to discourage Linda's visits, told her to forget Saraceno. "But I loved him." she said. "I refused to believe them." At the end of 3 15 months, Saraceno opened his eyes. He began watching Linda. Later. he could move a finger, then bis arms

and legs. He tried to speak. "I we the only one who could understand him when he tried to talk." Ith said. A year ago, Saracenu cou speak well enough that others could understand him. "Mr. Fraschalk and the said Linda's father. James and the said Linda's father. ne told Linda's father, James, " like permission to marry so daughter." Peter Fraschal replied, "when you can walk down that aisle, she's all yours." Alt seven months in the hospital Sur ceno went to the Rehabilitation I stitute of Chicago. Finally he we home to subturban Melrose Pat Linda quit her job and supervis Linda quit her job and supervis his rebabilitation. And now, wi the aid of a walker, he is to we down the aisle of Our Lady Pompeii Church with Linda, "I going to be the biggest, most joyd Italian wedding on the West Sad Fraschalla said. "They've got people in the wedding party cause so many people want stand up with these two min stand up with these two mira kids." "The doctors call me miracle boy." Saraceno said, "an guess they're right. I'm lucky to alive, and I'm lucky to h Linda."

"I can't hear a word," a wor giggled as a man slepped up to dead microphone, "but I know. they're iotroducing."
